DEPARTMENT OF THE ARMY
OFFICE OF THE ASSISTANT SECRETARY
CIVIL WORKS
108 ARMY PENTAGON
WASHINGTON DC 20310-0108

APR 2 7 2009

Honorable Barbara Boxer
Chairwoman
Committee on Environment and Public Works
410 Dirksen Senate Office Building
Washington, D.C. 20510-6175

Dear Madam Chairwoman:

I am submitting the first annual Status Report on Construction Projects Requiring Mitigation, as required by Section 2036(b) of the Water Resources Development Act of 2007. The Fiscal Year 2009 status report consists of two spreadsheet tables which provide the information requested in Section 2036(b)(2)(A) and (C). One of the tables includes all projects currently under construction by the Corps. The other table lists the status of projects that require compensatory mitigation, as well as an estimate of the percentage of the construction and compensatory mitigation that has been completed. In response to Section 2036(b)(2)(B), a complete list of all the Corps' projects included in the Fiscal Year 2010 Budget can be accessed through the Corps' internet site when this information is released by the President. In addition, the status report will be made available on the Corps' Civil Works internet site concurrent with the release of the President's budget.

Section 2036(b)(1) also requires a report on the results of consultation required by Subsection 906(d)(4)(B) of the Water Resources Development Act of 1986, as amended, with appropriate Federal agencies and States in which the project is located. Although the Corps currently consults with the Federal resource agencies and States during the feasibility study phase when compensatory mitigation plans are prepared, additional consultation with States and Federal agencies to determining the success of mitigation projects will be accomplished.

If you have any questions, please don't hesitate to contact me. My departure from service as the Assistant Secretary of the Army for Civil Works

Printed on Recycled Paper

(ASA-CW) is now scheduled for April 30, 2009. At that time, the current Principal Deputy to the ASA-CW, Mr. Terrence "Rock" Salt, will become the Acting ASA-CW.

Very truly yours,

John Paul Woodley, Jr.

John Paul Woodley, Jr.
Assistant Secretary of the Army
(Civil Works)

Enclosures

PROJECTS UNDER CONSTRUCTION BY USACE (FY-09)

FOOTNOTES

1. The Upper Yazoo Project - The projects within the Yazoo Basin that are currently being constructed are the Delta Headwater Projects that reduce flooding and sedimentation in Northwest Mississippi, the Upper Yazoo Projects that were authorized to improve headwater flooding in the Yazoo Basin, and the Big Sunflower River Maintenance Project that is designed to restore flow capacity of the Big Sunflower Project completed in the 1960's. The remaining projects within the Yazoo Basin currently not in construction are the Yazoo Basin Backwater Pumping Plant, Main Stem Construction, and Backwater Area Construction projects. Also, the Yazoo Basin Reformulation study currently has two portions. The Yazoo Basin Tributaries Reformulation Study is currently receiving funding for continued study. The second portion is the Yazoo Basin Backwater Reformulation which as of August 2008 the EPA sanctioned a 404c veto halting any further study efforts.

2. Mississippi River and Tributaries Project - Mississippi River Levees, Dike Construction and Revetment Operation/Construction are all ongoing construction within MVK, MVM, and MVN .

3. St John's Bayou - Environmental Defense and the National Wildlife Federation filed suit in Federal court challenging the NEPA compliance of the project. On 13 September 2007, the Judge of the US District Court for the District of Columbia granted the Plaintiff's motion for summary judgment against the US Army Corps of Engineers and the Secretary of the Army. The Order sets aside the RSEIS 2, the 2002 RSEIS, and the ROD. The Corps was directed to cease construction and remove any part of the project that had been built. The Department of Justice and Solicitor General decided not to appeal. The Corps will comply with the court's order to restore the site and will prepare additional NEPA documentation.

4. Inner Harbor Navigation Canal (IHNC) Lock Replacement Project - Construction of this project was underway when the project was enjoined by Federal District court in late 2006, pending the preparation of a supplemental EIS. The final supplemental EIS is expected to be released for 30-day agency review in April 2009.

5. Morganza to the Gulf of Mexico Project - Federal construction of the project has not commenced. A post-authorization change report is being prepared due to substantial escalation of project cost estimates since it was authorized. The non-Federal sponsor has initiated construction of project components. The amount of work-in-kind credit that will be allowed for the non-Federal sponsor's construction efforts will be determined when the project is re-authorized.

SWD	SWL	MCKLELLAN-KERR ARKANSAS RIVER, 12-FOOT CHANNEL DEEPENING	Construction is 3% complete. Mitigation is 4% complete.
SWD	SWT	CANTON LAKE, OK	Construction is 14% complete. Mitigation is 10% complete.
SWD	SWT	RED RIVER BASIN CHLORIDE CONTROL, TX & OK	Construction is 30% complete. Mitigation is 100% complete.

Percent Calculations: There are different methodologies utilized by Corps districts to calculate percent of mitigation complete. A number of projects the mitigation percent complete was calculated by number of acres completed divided by number of acres required. In some cases where acre numbers did not directly apply or were unknown, percent mitigation was determined by implementation (construction dollars spent) divided by what was required or scheduled.

FOOTNOTES

1. The Upper Yazoo Project - The projects within the Yazoo Basin that are currently being constructed are the Delta Headwater Projects that reduce flooding and sedimentation in Northwest Mississippi, the Upper Yazoo Projects that were authorized to improve headwater flooding in the Yazoo Basin, and the Big Sunflower River Maintenance Project that is designed to restore flow capacity of the Big Sunflower Project completed in the 1960's.
