

## Introduction

The purpose of this guide is to inform you of the military training activities that took place at the former Dalhart Army Air Field and to raise awareness of the explosive hazards that may exist at the property.

Dalhart Army Air Field was established in 1942 to support flight training efforts for WWII. Training at the Dalhart Army Air Field consisted of high-altitude flying and bombing practice. An area of the property has been identified through historical research and site visits as being a Potential Munitions Burial Area. The munitions associated with the burial area are general small arms and various bombs.

The former Dalhart Army Air Field is located in Hartley County, Texas, just south of the city of Dalhart. Today, the city of Dalhart operates the Dalhart Municipal Airport on a large portion of the former air field property. Former air field property located outside the Dalhart Municipal Airport boundary is used for residential and agricultural purposes. As depicted on the inside map, the Potential Munitions Burial Area is located just north of the airport property and is currently owned by numerous private landowners.

Because explosive hazards associated with military munitions from past military training may remain on the former Dalhart Army Air Field Potential Munitions Burial Area, the U.S. Army Corps of Engineers recommends landowners and visitors follow the 3Rs of Explosives Safety – Recognize, Retreat, and Report.

## Frequently Asked Questions

Q: *What types of potential hazards exist?*

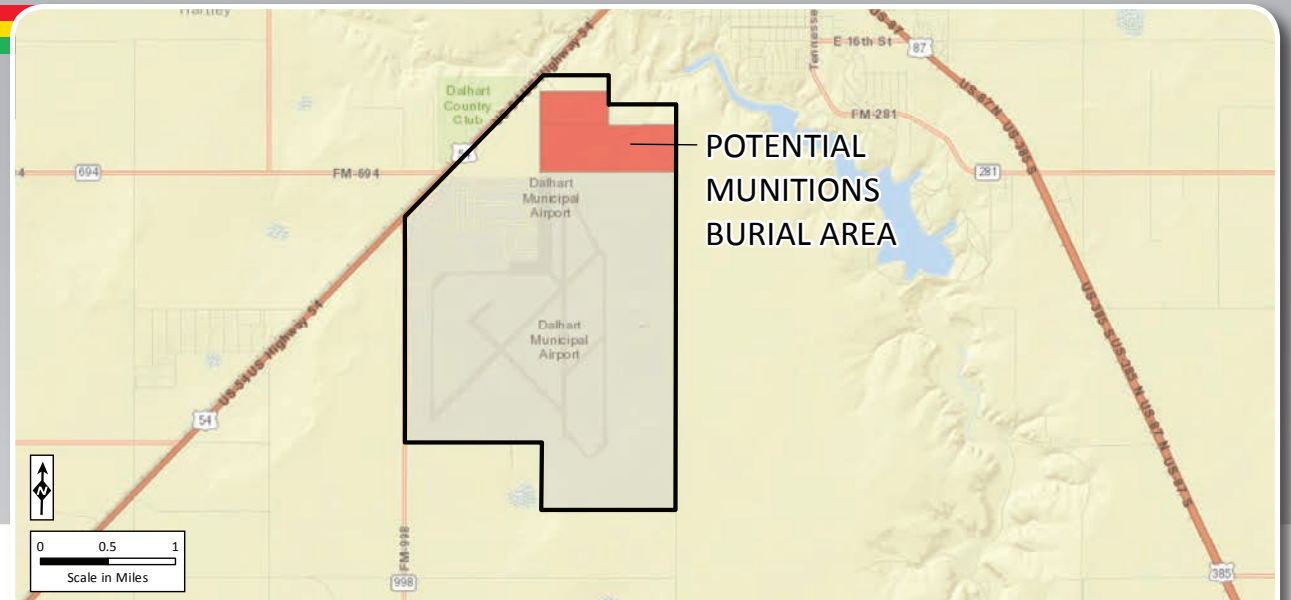

A: Military munitions such as general small arms and various bombs were potentially disposed of at the munitions burial area. The U.S. Army Corps of Engineers is unable to rule out the presence of munitions that may pose an explosive hazard.

Q: *What do I do if I suspect I may have come across a military munition?*

A: If you suspect you may have come across a military munition, the best way to ensure your safety is to follow the 3Rs of Explosives Safety: **Recognize** that munitions are dangerous; **Retreat** — do not approach, touch, move or disturb it, but carefully leave the area; and **Report** immediately what you saw and where you saw it to local law enforcement — call 911.

Q: *What are the findings of the work that the government has completed?*

A: Historical research and site inspections indicate that military munitions were previously used at this air field and some munitions may remain on the property. The U.S. Army Corps of Engineers has

### Legend

determined that further investigation is required for the Potential Munitions Burial Area at the former Dalhart Army Air Field.

Q: *What will be done next?*

A: The U.S. Army Corps of Engineers will make explosives safety education material that is based on the 3Rs available to landowners and the community. Additionally, it will coordinate with landowners as it plans required response activities.

Q: *Where can I get more information?*

A: For more information, call the Formerly Used Defense Sites Information Center toll-free number 1-855-765-FUDS (3837). Additional information about the site can be found by using the Geographical Information System tool on the Formerly Used Defense Sites website at [www.fuds.mil](http://www.fuds.mil).

## Follow the 3Rs of Explosives Safety

**Recognize**

when you may have come across a munition, and that munitions are dangerous;

**Retreat**

do not approach, touch, move or disturb a suspect munition, but carefully leave the area; and

**Report**

immediately what was found to local law enforcement — call **911**.
