190 FIFTH STREET EAST, SUITE 401

ST. PAUL, MN 55101-1638

Finding of No Significant Impact

In accordance with the National Environmental Policy Act, the St. Paul District, Corps of Engineers, has assessed the environmental impacts of the following project:

**ROSEAU, MINNESOTA
FLOOD DAMAGE REDUCTION PROJECT
ROSEAU RIVER**

The purpose of the actions proposed in this environmental assessment is to provide flood protection to the city of Roseau, Minnesota. Activities would include the construction of a diversion channel, a restriction bridge in the Roseau River, and several levees including those which would establish water storage areas for large volume floods. The project is described in Section IV of the Environmental Assessment. This Finding of No Significant Impact is based on the following factors: the project would have substantial positive impacts on public health and safety, flood damage reduction and recreation and would have no appreciable effects to fish, wildlife, woodland, and wetland resources or the social or cultural environment. None of the project effects were determined to be significant. Continued coordination will be maintained with appropriate agencies and individuals.

The environmental review process indicates that the proposed action does not constitute a major Federal action significantly affecting the quality of the human environment. Therefore, an Environmental Impact Statement will not be prepared.
