Note: For information regarding the approval authority and signature authority for a project specific agreement developed using the current version of the Section 569 Sponsor Performance Construction model, go to the Implementation Memo link to see the Section 569 Models for Sponsor Performance of Work Implementation Memo, dated 2 September 2005.

MODEL APPLICABILITY:

The Section 569 Sponsor Performance Construction model is one of six models to be developed for providing environmental assistance to non-Federal interests in northeastern Minnesota pursuant to Section 569 of the Water Resources Development Act of 1999, Public Law 106-53, as amended. The other models will address different combinations of design, construction, design and construction, and whether the work will be performed by the sponsor or the Government.

This model should be used when the sponsor requests only construction of the project be undertaken in the proposed agreement and the sponsor will be performing the work. The Federal share will be provided in the form of reimbursement. This model should not be used for implementation of projects under any of the other environmental infrastructure authorities, an

agreement addressing design only of a Section 569 project, an agreement addressing both design and construction of a Section 569 project, nor for any Section 569 projects where the work will be performed by the Government.

Project specific agreements developed using this model cannot be approved for execution prior to compliance with all applicable environmental laws and regulations including, but not necessarily limited to, NEPA and Section 401 of the Federal Water Pollution Control Act (33 U.S.C. 1341).
