RE: Support for the Harbor / South Bay Water Recycling Project

Dear Senator Dianne Feinstein, Senator Barbara Boxer, Representative Janice Hahn, Representative Maxine Waters and Representative Henry Waxman:

As Executive Director of the Santa Monica Bay Restoration Commission, I want to thank you for your ongoing support and leadership on behalf of West Basin Municipal Water District's ("West Basin") efforts to drought-proof Los Angeles County through the development of innovative water recycling and conservation programs. To that end, we are requesting your assistance in raising the authorization ceiling for the Harbor/South Bay Water Recycling Project from \$35 million to \$70 million through Section 7001, *proposed modifications to authorized U.S. Army Corps of Engineers water resources development projects*, as established in the recently passed Water Resources Reform and Development Act of 2014. To date, with your support, Congress has provided \$35 million for the project.

Your effort on behalf of West Basin has been instrumental in helping to reduce our region's dependence on imported water supplies from the environmentally sensitive Bay/Delta and the federally controlled Colorado River. The water recycling programs you have supported

our mission: to restore and enhance the santa monica bay through actions and partnerships that improve water quality, conserve and rehabilitate natural resources, and protect the bay's benefits and values

also directly reduce the amount of effluent discharged into the Santa Monica Bay, a National Marine Estuary, and have enabled the region to withstand the current drought crisis.

West Basin's water recycling programs have proven tremendously successful in delivering recycled water to communities throughout the region, and the Harbor/ South Bay Water Recycling Project is the core of this program. West Basin's partnership with the U. S. Army Corps of Engineers has proved invaluable to the region and we look forward to continuing to work with them to see the project completed to its ultimate capacity.

The Harbor/South Bay Water Recycling Project will annually develop up to 70 million gallons of recycled water each day and shall be used for municipal, industrial, and environmental purposes in the coastal Los Angeles County area. This alternative source of water shall reduce southern California's dependence on imported water from the San Joaquin Bay Delta and will improve water reliability in the region. Finally, this project is estimated to have created more than 1,500 jobs throughout the construction process, and will yield clear and measurable long-term returns for this limited and finite short-term investment.

For the reasons stated herein, I proudly support West Basin and the Harbor / South Bay Water Recycling Project and ask for your continued support. If you have any questions about this project or its regional and federal benefits, please do not hesitate to contact me directly.

Thank you, again, for your past support and your consideration of this request.

Sincerely,

**Tom Ford, Executive Director
Santa Monica Bay Restoration Commission**

RESOLUTION NO. 10-3963

A RESOLUTION OF THE CITY COUNCIL OF THE
CITY OF WEST HOLLYWOOD SUPPORTING WEST
BASIN MUNICIPAL WATER DISTRICT'S WATER
RELIABILITY 2020 PROGRAM

THE CITY COUNCIL OF THE CITY OF WEST HOLLYWOOD DOES
HEREBY RESOLVE AS FOLLOWS:

WHEREAS, Southern California is facing a challenging water situation due to court-ordered water delivery cutbacks from the San Joaquin Bay Delta to Southern California, long-term drought on the Colorado River, below average rainfall, decreased runoff from the Sierra Nevada Mountain's snowpack, climate change; and

WHEREAS, the two-thirds of coastal Los Angeles County's current water demand is imported from the San Joaquin Bay Delta and the Colorado River, making the region vulnerable to mandatory conservation or water rationing in times of shortages; and

WHEREAS, Governor Arnold Schwarzenegger declared a statewide emergency in 2009 and called for immediate action to help preserve the region's water storage reserves; urging cities, counties, local public water agencies to achieve extraordinary conservation by adopting and enforcing drought ordinances, accelerating public outreach and messaging efforts and developing additional local supplies; and

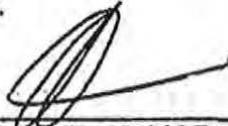

WHEREAS, West Basin Municipal Water District is the wholesale supplier of water to retail customers in coastal Los Angeles County, and is responsible for delivering a reliable, safe, high-quality water supply; and

WHEREAS, in response to the long term challenges we face, West Basin will increase the region's local water supplies through Water Reliability 2020, a program that will double conservation and water recycling efforts, expand youth education programs and introduce additional ocean-water desalination opportunities to decrease dependence on imported water from two-thirds to one-third by 2020:

THEREFORE LET IT BE RESOLVED that the City Council of the City of West Hollywood hereby supports West Basin's efforts and the Water Reliability 2020 program.

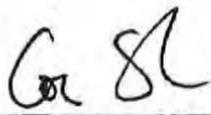

PASSED, APPROVED AND ADOPTED by the City Council of the City of West Hollywood at a regular meeting held this 5th day of April, 2010 by the following vote:

AYES:	Councilmember:	Duran, Horvath, Prang, Mayor Pro Tempore Heilman, and Mayor Land.
NOES:	Councilmember:	None.
ABSENT:	Councilmember:	None.
ABSTAIN:	Councilmember:	None.

RE: SUPPORT FOR THE HARBOR / SOUTH BAY WATER RECYCLING PROJECT

Dear Senator Boxer:

On behalf of the City of Gardena, I want to thank you for your ongoing support and leadership on behalf of West Basin Municipal Water District's ("West Basin") efforts to drought-proof Los Angeles County through the development of innovative water recycling and conservation programs. To that end, we are requesting your assistance in raising the authorization ceiling for the Harbor/South Bay Water Recycling Project from \$35 million to \$70 million through Section 7001, *proposed modifications to authorized U.S. Army Corps of Engineers water resources development projects*, as established in the recently passed Water Resources Reform and Development Act of 2014. To-date, with your support, Congress has provided \$35 million for the project.

Your effort on behalf of West Basin has been instrumental in helping to reduce our region's dependence on imported water supplies from the environmentally sensitive Bay/Delta and the federally controlled Colorado River. The water recycling programs you have supported also directly reduce the amount of effluent discharged into the Santa Monica Bay, a National Marine Estuary, and have enabled the region to withstand the current drought crisis.

West Basin's water recycling programs have proven tremendously successful in delivering recycled water to communities throughout the region, including the City of Gardena, and the Harbor/ South Bay Water Recycling Project is the core of this program. Our partnership with West Basin and the U. S. Army Corps of Engineers has proved invaluable to this point and we look forward to continuing to work with them to see the project completed to its ultimate capacity.

The Harbor/South Bay Water Recycling Project will annually develop up to 70 million gallons of recycled water each day and shall be used for municipal, industrial, and environmental purposes in the coastal Los Angeles County area. This alternative source of water shall reduce southern California's dependence on imported water from the San Joaquin Bay Delta and will improve water reliability in the region. Finally, this project is estimated to have created more than 1,500 jobs throughout the construction process, and will yield clear and measurable long-term returns for this limited and finite short-term investment.

For the reasons stated herein, we proudly support West Basin and the Harbor / South Bay Water Recycling Project and ask for your continued support. If you have any questions about this project or its regional and federal benefits, please do not hesitate to contact me directly.

Thank you, again, for your past support and your consideration of this request.

Respectfully,

PAUL K. TANAKA
Mayor, City of Gardena

RE: SUPPORT FOR THE HARBOR / SOUTH BAY WATER RECYCLING PROJECT

Dear Senator Feinstein:

On behalf of the City of Gardena, I want to thank you for your ongoing support and leadership on behalf of West Basin Municipal Water District's ("West Basin") efforts to drought-proof Los Angeles County through the development of innovative water recycling and conservation programs. To that end, we are requesting your assistance in raising the authorization ceiling for the Harbor/South Bay Water Recycling Project from \$35 million to \$70 million through Section 7001, *proposed modifications to authorized U.S. Army Corps of Engineers water resources development projects*, as established in the recently passed Water Resources Reform and Development Act of 2014. To-date, with your support, Congress has provided \$35 million for the project.

Your effort on behalf of West Basin has been instrumental in helping to reduce our region's dependence on imported water supplies from the environmentally sensitive Bay/Delta and the federally controlled Colorado River. The water recycling programs you have supported also directly reduce the amount of effluent discharged into the Santa Monica Bay, a National Marine Estuary, and have enabled the region to withstand the current drought crisis.

West Basin's water recycling programs have proven tremendously successful in delivering recycled water to communities throughout the region, including the City of Gardena, and the Harbor/ South Bay Water Recycling Project is the core of this program. Our partnership with West Basin and the U. S. Army Corps of Engineers has proved invaluable to this point and we look forward to continuing to work with them to see the project completed to its ultimate capacity.

The Harbor/South Bay Water Recycling Project will annually develop up to 70 million gallons of recycled water each day and shall be used for municipal, industrial, and environmental purposes in the coastal Los Angeles County area. This alternative source of water shall reduce southern California's dependence on imported water from the San Joaquin Bay Delta and will improve water reliability in the region. Finally, this project is estimated to have created more than 1,500 jobs throughout the construction process, and will yield clear and measurable long-term returns for this limited and finite short-term investment.

For the reasons stated herein, we proudly support West Basin and the Harbor / South Bay Water Recycling Project and ask for your continued support. If you have any questions about this project or its regional and federal benefits, please do not hesitate to contact me directly.

Thank you, again, for your past support and your consideration of this request.

Respectfully,

PAUL K. TANAKA

Mr. Ron Wildermuth
Public and Governmental Affairs Manager
West Basin Municipal Water District
17140 S. Avalon Blvd. Suite 210
Carson, CA 90746-1296

Dear Mr. Wildermuth:

I recently received an explanation of West Basin Municipal Water District's (West Basin) Water Reliability 2020 program.

I understand the Water Reliability 2020 Program will double West Basin's recycled water efforts, double its conservation program, increase water education programs and pursue adding twenty million gallons a day of ocean water desalination as a new locally controlled water supply. Water Reliability 2020 will increase local control of our water supplies from one-third today to two-thirds by the year 2020. Increasing our water reliability is important to the continued vitality of our region.

West Basin's Water Reliability 2020 Program will provide the following local benefits:

- Improved water reliability for the coastal area of Los Angeles
- Protection from the negative impacts of future droughts
- An emergency supply should imported water be temporarily cut off for any reason
- Reduction of overall energy use through increasing conservation and recycling
- Ease the strain on the Sacramento-San Joaquin Bay Delta
- Assist Metropolitan Water District of Southern California in meeting future water needs
- Provide a more reliable water supply at virtually the same cost as imported water
- Mitigate the effects of global warming
- Improve our local water quality, overtime

For the above reasons, you can count on Convaid as a positive supporter of the project, and I look forward to seeing the Water Reliability 2020 Program become a reality.

Sincerely,

A handwritten signature in blue ink, appearing to read "C. Braun", written over a light blue horizontal line.

Subject: Water Reliability 2020 Program

Dear Mr. Wildermuth:

I recently received a presentation on West Basin Municipal Water District's (West Basin) Water Reliability 2020 program.

I understand the Water Reliability 2020 Program will double West Basin's recycled water efforts, double its conservation program, increase water education programs and add twenty million gallons-a-day of ocean-water desalination as a new locally controlled water supply. Water Reliability 2020 will increase local control of our water supplies from one-third today to two-thirds by the year 2020. Increasing our water reliability is important to the continued vitality of our region.

West Basin's Water Reliability 2020 Program will provide the following local benefits:

- Improved water reliability for the coastal area of Los Angeles.
- Protection from the negative impacts of future droughts.
- An emergency supply should imported water be temporarily cut off for any reason.
- Reduction of overall energy use through increasing conservation and recycling.
- Ease the strain on the Sacramento-San Joaquin Bay Delta.
- Assist Metropolitan Water District of Southern California in meeting future water needs.
- Provide a more reliable water supply at virtually the same cost as imported water.
- Mitigate the effects of global warming.
- Improve our local water quality, overtime.

As part of our environmental stewardship and corporate responsibility efforts, Northrop Grumman established the "greenNG Program" to reduce solid waste and green house gas emissions while promoting water conservation and energy efficiency programs. These efforts allowed us to receive numerous recognitions by government and private industry organizations for our environmental conservation efforts.

- Improved water reliability for the coastal area of Los Angeles.
- Protection from the negative impacts of future droughts.
- An emergency supply should imported water be temporarily cut off for any reason.
- Reduction of overall energy use through increasing conservation and recycling.
- Ease the strain on the Sacramento-San Joaquin Bay Delta.
- Assist Metropolitan Water District of Southern California in meeting future water needs.
- Provide a more reliable water supply at virtually the same cost as imported water.
- Mitigate the effects of global warming.
- Improve our local water quality, overtime

For the above reasons, you can count on the ARJAY Telecom as a positive supporter of the project, and I look forward to seeing the Water Reliability 2020 Program become a reality.

Sincerely,

May 22, 2013

Mr. Ron Wildermuth
Public and Governmental Affairs Manager
West Basin Municipal Water District
17140 S. Avalon Blvd., Suite 210
Carson, CA 90746-1296

Dear Mr. Wildermuth:

I, Harold E. Hofmann, recently received information about West Basin Municipal Water District's (West Basin) Water Reliability program.

The Water Reliability 2020 Program is expected to double West Basin's recycled water efforts, double its conservation program increase water education programs and pursue adding twenty million gallons-a-day of ocean-water desalination as a new locally controlled water supply. Water Reliability 2020 will increase local control of our water supplies from one-third today to two-thirds by the year 2020. Increasing our water reliability is important to the continued vitality of our region.

West Basin's Water Reliability 2020 Program will provide the following local benefits:

- Improved water reliability for the coastal area of Los Angeles
- Protection from the negative impacts of future droughts
- An emergency supply should imported water be temporarily cut off for any reason
- Reduction of overall energy use through increasing conservation and recycling
- Ease for the strain on the Sacramento-San Joaquin Bay Delta
- Assistance to the Metropolitan Water District of Southern California to meet future water needs
- Provision of a more reliable water supply at the same cost as imported water
- Mitigation of the effects of global warming
- Improvement of our local water quality, over time
- Addition to future economic growth and jobs

I look forward to seeing the Water Reliability 2020 Program become a reality.

Sincerely,

Harold E. Hofmann
Mayor

Carson, CA 90746-1296

Dear Rich,

You recently briefed us on West Basin Municipal Water District's (West Basin) Water Reliability 2020 program during our meeting October 12th at the Edward C. Little Water Recycling Facility.

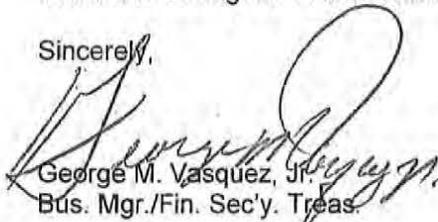

I understand the Water Reliability 2020 Program will double West Basin's recycled water efforts, double its conservation program, increase water education programs and pursue adding twenty million gallons daily of ocean-water desalination as a new locally controlled water supply. Water Reliability 2020 will increase local control of our water supplies from one-third today to two-thirds by the year 2020. Increasing our water reliability is important to the continued vitality of our region.

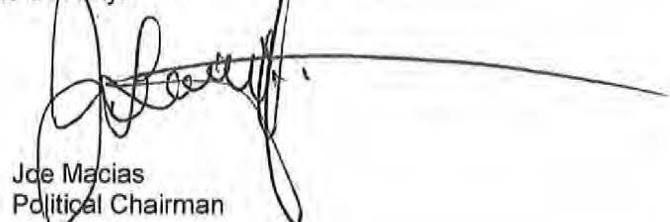

West Basin's Water Reliability 2020 Program will provide the following local benefits:

- Improved water reliability for the coastal area of Los Angeles
- Protection from the negative impacts of future droughts
- An emergency supply should import water if temporarily cut off for any reason
- Reduction of overall energy use through increasing conservation and recycling
- Ease the strain on the Sacramento-San Joaquin Bay Delta
- Assist the Metropolitan Water District of Southern California to meet future water needs
- Provision of a more reliable water supply at the same cost as imported water
- Mitigation of the effects of global warming
- Improvement of our local water quality, overtime
- Addition to future economic growth and jobs

For the above reasons, you can count us, the Steam, Refrigeration, Air Conditioning, Pipe Fitters, Welders, & Apprentices of the United Association, UA 250, as a positive supporter of the project. I look forward to seeing the Water Reliability 2020 Program become a reality.

Sincerely,

George M. Vasquez, Jr.

Dear Rich,

You recently briefed us on West Basin Municipal Water District's (West Basin) Water Reliability 2020 program during our meeting October 12th at the Edward C. Little Water Recycling Facility.

We understand the Water Reliability 2020 Program will double West Basin's recycled water efforts, double its conservation program, increase water education programs and pursue adding twenty million gallons-a-day of ocean-water desalination as a new locally controlled water supply. Water Reliability 2020 will increase local control of our water supplies from one-third today to two-thirds by the year 2020. Increasing our water reliability is important to the continued vitality of our region.

West Basin's Water Reliability 2020 Program will provide the following local benefits:

- Improved water source for the coastal area of Los Angeles.
- Protection from the negative impacts of future droughts.
- An emergency water supply incase imported water is cut off for any reason.
- Reduced energy use through increased conservation and recycling.
- Eased strain on the Sacramento-San Joaquin Bay Delta.
- Added source to Metropolitan Water District of Southern California to meet future water needs.
- Other means of reliable water supply at the same cost as imported water.
- Reduced global warming effects.
- Improved local water quality.
- Economic growth and jobs.

For the above reasons, you can count us, Painters and Allied Trades District Council #36, as a supporter of the project, and look forward to seeing the Water Reliability 2020 Program become a reality.

Sincerely,

Carson, CA 90746-1296

Dear Mr. Wildermuth:

Raytheon recently received a presentation on West Basin Municipal Water District's Water Reliability 2020 Program, a plan to decrease imported (Delta) water demand in the West Basin service area from 66% to 33%, by 2020. After learning about your responsible approach to achieving this strategic water resource planning objective, we would like to offer our support for Water Reliability 2020.

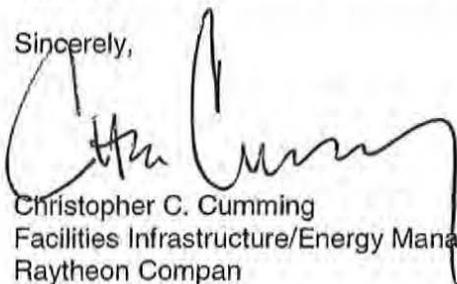

As proposed, Water Reliability 2020 will double West Basin's water recycling efforts, maximize West Basin's conservation program, increase water education programs throughout your service area and responsibly pursue ocean-water desalination as a new locally controlled water supply. Water Reliability 2020 will increase West Basin's local controlled water supplies from one-third today to two-thirds by the year 2020. This program is crucial, as increasing our water reliability is important to the continued vitality of our region.

West Basin's Water Reliability 2020 Program will provide the following local benefits:

- Improved water reliability for the coastal area of Los Angeles County.
- Protection from the negative impacts of future droughts.
- An emergency water supply should imported water be temporarily cut off for any reason.
- Reduction of overall energy use through increase conservation and water recycling.
- Ease the strain on the Sacramento-San Joaquin Bay Delta.
- Assist Metropolitan Water District of Southern California in meeting future water needs.
- Provide a more reliable water supply at virtually the same cost as imported water.
- Mitigate the effects of global warming.
- Improve our local water quality, overtime.

For the above reasons, you can count on Raytheon as a supporter of West Basin's Water Reliability 2020 program. We look forward to seeing the Water Reliability 2020 Program become a reality.

Sincerely,

Christopher C. Cumming
Facilities Infrastructure/Energy Manager

Mr. Ron Wildermuth
Manager of Public Information and Conservation
West Basin Municipal Water District
17140 S. Avalon Blvd. Suite 210
Carson, CA 90746-1296

Dear Mr. Wildermuth:

Our organization recently received a presentation on West Basin Municipal Water District's Water Reliability 2020 Program, a plan to increase local control of our water future.

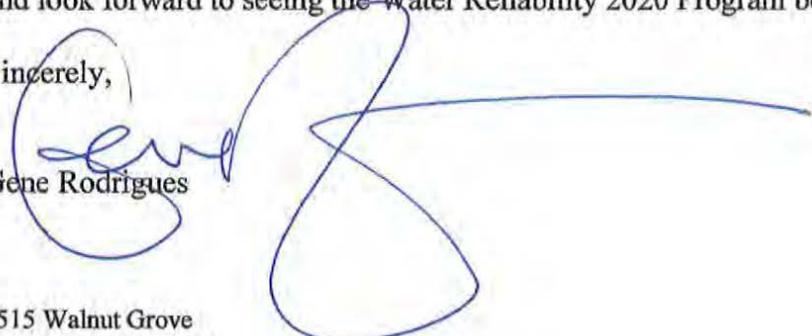

We understand the Water Reliability 2020 Program will double our recycled water efforts, double our conservation program, increase our water education programs and add twenty million gallons-a-day of ocean-water desalination as a new locally controlled water supply. Water Reliability 2020 will increase our local control of our water supplies from one-third today to two-thirds by the year 2020. Increasing our water reliability is important to the continued vitality of our region.

West Basin's Water Reliability 2020 Program will provide the following local benefits:

- Reduce our overall energy use through increasing conservation and recycling.
- Improve future water reliability for the coastal area of Los Angeles.
- Provide protection from the negative impacts of future droughts.
- Provide an emergency supply should imported water be temporarily cut off for any reason.
- Ease the strain on the Sacramento-San Joaquin Bay Delta.
- Assist Metropolitan Water District of Southern California in meeting future water needs.
- Provide a more reliable water supply at virtually the same cost as imported water.
- Help mitigate the effects of global warming.
- Improve our local water quality

For the above reasons, you can count on our organization as a positive supporter of the project, and look forward to seeing the Water Reliability 2020 Program become a reality.

Sincerely,

Carson, CA 90746-1296

Dear Mr. Wildermuth:

On behalf of the City Council of the City of Rancho Palos Verdes, I am pleased to offer our support for West Basin Municipal Water District's Water Reliability 2020 program. I want to thank you for working with City staff to review the details of the program and for taking the time to make a presentation to the City Council.

As proposed, the Water Reliability 2020 program will seek to double West Basin's water recycling efforts, maximize its conservation program, increase water education programs throughout West Basin's service area, and continue to pursue responsible ocean-water desalination as a new, locally controlled water source. I understand that one of the goals of the program is to increase the percentage of locally controlled water supplies from the current one-third level to two-thirds by 2020.

Given the well-established importance of water management and conservation throughout the history of California, the City of Rancho Palos Verdes heartily endorses the efforts of this program and wishes the District well in its pursuit of increased local water supply reliability and independence.

Sincerely,

Tom Long

RON WILDERMUTH
Public and Governmental Affairs Manager
WEST BASIN MUNICIPAL WATER DISTRICT
17140 South Avalon Boulevard Suite 1200
Carson, California 90746-1296

Re: West Basin Water Reliability 2020 Program

Dear Mr. Wildermuth:

Normandie Casino recently learned of the West Basin Municipal Water District's Water Reliability 2020 Program. The goal of this plan is to decrease imported (Delta) water demand in the West Basin Service area from 66% to 33% by 2020. After learning about this responsible approach to achieving strategic water resource planning objectives, Normandie would like to offer its support for the Program.

As currently proposed, it appears to Normandie that the Water Reliability 2020 Program will double West Basin's water recycling efforts; maximize West Basin's conservation program; increase water education programs through the service area; and responsibly pursue ocean-water desalination as a new locally controlled water supply. It additionally appears that Water Reliability 2020 will increase West Basin's local controlled water supplies from one-third today to two-thirds by the year 2020. This program may prove crucial as increasing our water reliability is important to the continued vitality of our region.

Our understanding of the program is that West Basin's Water Reliability 2020 Program will provide the following local benefits:

- Improved water reliability for the coastal area of Los Angeles County;
- Protection from the negative impacts of future droughts;
- It may provide for an emergency water supply should imported water be temporarily cut off for any reason;
- Reduce overall energy use through increase conservation and water recycling;
- Ease the strain on the Sacramento-San Joaquin Bay Delta;
- Assist Metropolitan Water District of Southern California in meeting future water needs;

page 2

- Provide a more reliable water supply at virtually the same cost as imported water;
- Mitigate the effects of any actual climate changes;
- Improve over time the quality of our water.

For the above reasons, you may count on Normandie's support for these laudable goals. We look forward to the seeing the benefits of the Water Reliability 2020 Program become reality.

Sincerely yours,

MINUTE RESOLUTION

STATE OF CALIFORNIA)
COUNTY OF LOS ANGELES) SS:
CITY OF GARDENA)

I, MARIA E. MARQUEZ-BROOKES, City Clerk of the City of Gardena, California, do hereby certify that the City Council of said City, in regular session held April 13, 2010, adopted Minute Resolution No. 10-01 by a roll call vote as indicated:

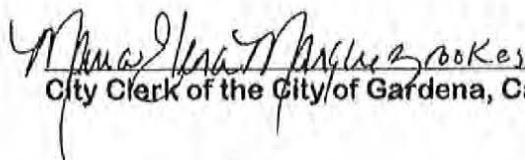

“RESOLVED, that the City Council of the City of Gardena, California, does hereby extend its support of the Water Reliability 2020 Program planned by the West Basin Municipal Water District which, if implemented, would decrease imported (Delta) water demand in the West Basin service area from 66% to 33% by 2020. This would be accomplished through efforts to double water recycling efforts; to maximize West Basin Water’s conservation program; to increase water education programs throughout the service area; and to responsibly pursue ocean-water desalination as a new locally-controlled water supply. Further, a few of the many local benefits of the 2020 Program includes improved water reliability for the coastal area of Los Angeles County; protection from the negative impacts of future droughts; an emergency water supply should imported water be temporarily cut off for any reason; and reduction of overall energy use through increase conservation and water recycling. All of the above is important to the continued vitality of Gardena and the entire region of the West Basin Municipal Water District.”

AYES: MAYOR PRO TEM MEDINA, COUNCIL MEMBERS JOHNSON AND CERDA, AND MAYOR TANAKA

NOES: NONE

ABSENT: COUNCILMAN IKEJIRI

This Minute Resolution is dated this 13th day of April, 2010.

RESOLUTION OF THE CITY COUNCIL OF THE CITY OF
MANHATTAN BEACH, CALIFORNIA, SUPPORTING WEST BASIN'S
WATER RELIABILITY 2020 PROGRAM FOR THE CITY OF
MANHATTAN BEACH

WHEREAS, Southern California is facing a challenging water situation due to court-ordered water delivery cutbacks from the San Joaquin Bay Delta to Southern California, long-term drought on the Colorado River, below average rainfall, decreased runoff from the Sierra Nevada Mountain's snowpack, climate change; and

WHEREAS, the two-thirds of coastal Los Angeles County's current water demand is imported from the San Joaquin Bay Delta and the Colorado River, making the region vulnerable to mandatory conservation or water rationing in times of shortages; and

WHEREAS, Governor Arnold Schwarzenegger declared a statewide emergency in 2009 and called for immediate action to help preserve the region's water storage reserves; urging cities, counties, local public water agencies to achieve extraordinary conservation by adopting and enforcing drought ordinances, accelerating public outreach and messaging efforts and developing additional local supplies; and

WHEREAS, West Basin Municipal Water District is the wholesale supplier of water to retail customers in coastal Los Angeles County, and is responsible for delivering a reliable, safe, high-quality water supply; and

WHEREAS, in response to the long term challenges we face, West Basin will increase the region's local water supplies through Water Reliability 2020, a program that will double conservation and water recycling efforts, expand youth education programs and introduce additional ocean-water desalination opportunities to decrease dependence on imported water from two-thirds to one-third by 2020.

THEREFORE LET IT BE RESOLVED, that the City of Manhattan Beach strongly supports West Basin's efforts and the Water Reliability 2020 program.

SECTION 1. The City Clerk shall certify to the adoption of this resolution and thenceforth and thereafter the same shall be in full force and effect.

PASSED, APPROVED and ADOPTED this 6th day of April, 2010.

Ayes: Tell, Powell, Cohen, Montgomery and Mayor Ward.
Noes: None.
Abstain: None.
Absent: None.

/s/ Mitch Ward
Mayor, City of Manhattan Beach, California

City Clerk of the City of Manhattan Beach, California

Deputy

Support for West Basin Municipal Water District's Water Reliability 2020 Program

As a fellow leader in the water industry, I understand the need for West Basin Municipal Water District's Water Reliability 2020 initiative. With circumstance such as population growth, returning water to the environment, impacts of global warming, possible future litigation, restrictions on water movement and other supply issues, I appreciate and support the direction West Basin has taken. Many other water agencies are also pursuing new water sources and more local control, which cumulatively will help all water users in California.

RESOLUTION NO. 09-61

A RESOLUTION OF THE CITY COUNCIL OF THE CITY OF MALIBU
SUPPORTING WEST BASIN MUNICIPAL WATER DISTRICT'S WATER
RELIABILITY 2020 PROGRAM

The City Council of the City of Malibu does hereby find, order and resolve as follows:

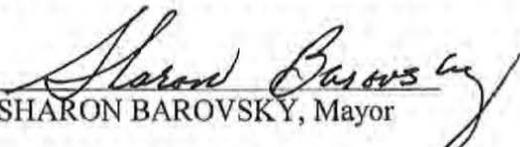

SECTION 1. Recitals.

- A. Southern California is currently dependent on imported water from Northern California and the Colorado River to meet local water needs; these imported water supplies are becoming increasingly unreliable.
- B. West Basin Municipal Water District (West Basin) has developed a program to reduce regional dependence on imported water from today's 66 percent down to 33 percent by the year 2020.
- C. West Basin's Water Reliability 2020 program will double water recycling, double water conservation, expand education, and develop a new, emergency supply (of only 10%) of desalted ocean water.
- D. West Basin is a public water agency that will expand all of its current sources of water to the maximum possible, and establish an Ocean Water Desalination Demonstration Project to test ways to recycle ocean water without harming the marine environment.

SECTION 2. The City Council of the City of Malibu supports West Basin's Water Reliability 2020 program because this Program will use less energy than importing water and provide water for future sustainable cities.

SECTION 3. The City Clerk shall certify to the passage and adoption of this resolution and enter it into the book of original resolutions.

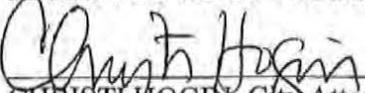

PASSED, APPROVED, and ADOPTED this 9th day of November, 2009.

SHARON BAROVSKY, Mayor

ATTEST:

APPROVED AS TO FORM:

CHRISTI HOGIN, City Attorney

June 22, 2009

Mr. Ron Wildermuth
Public and Governmental Affairs Manager
West Basin Municipal Water District
17140 S. Avalon Blvd., Suite 210
Carson, CA 90746-1296

Dear Mr. Wildermuth:

As the Vice President of Public Affairs for Watson Land Company, I was given a presentation on West Basin Municipal Water District's Water Reliability 2020 Program, a plan to increase local control of our water future.

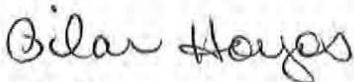

I understand the Water Reliability 2020 Program will double our recycled water efforts, double our conservation program, increase our water education programs and add twenty million gallons-a-day of ocean-water desalination as a new locally controlled water supply. Water Reliability 2020 will increase our local control of our water supplies from one-third today to two-thirds by the year 2020. Increasing our water reliability is important to the continued vitality of our region.

West Basin's Water Reliability 2020 Program will provide the following local benefits:

- Improved water reliability for the coastal area of Los Angeles.
- Protection from the negative impacts of future droughts.
- An emergency supply, should imported water be temporarily cut off for any reason.
- Reduction of overall energy use through increasing conservation and recycling.
- Ease the strain on the Sacramento-San Joaquin Bay Delta.
- Assist Metropolitan Water District of Southern California in meeting future water needs.
- Provide a more reliable water supply at virtually the same cost as imported water.
- Mitigate the effects of global warming.
- Improve our local water quality, overtime.

For the above reasons, you can count on Watson Land Company as a positive supporter of the program, and I look forward to seeing the Water Reliability 2020 Program become a reality.

Sincerely,

Pilar Hoyos
Vice President, Public Affairs

Mr. Ron Wildermuth
Public and Governmental Affairs Manager
West Basin Municipal Water District
17140 S. Avalon Blvd. Suite 210
Carson, CA 90746-1296

Dear Mr. Wildermuth:

The South Bay Cities Council of Governments (SBCCOG) recently received a presentation on West Basin Municipal Water District's Water Reliability 2020 Program, a plan to increase local control of our water future.

We understand the Water Reliability 2020 Program will double our recycled water efforts, double our conservation program, increase our water education programs and add twenty million gallons-a-day of ocean-water desalination as a new locally controlled water supply. Water Reliability 2020 will increase our local control of our water supplies from one-third today to two-thirds by the year 2020. Increasing our water reliability is important to the continued vitality of our region.

West Basin's Water Reliability 2020 Program will provide the following local benefits:

- Improve water reliability for the coastal area of Los Angeles.
- Provide protection from the negative impacts of future droughts.
- Establish an emergency supply should imported water be temporarily cut off for any reason.
- Reduce overall energy use through increasing conservation and recycling.
- Ease the strain on the Sacramento-San Joaquin Bay Delta.
- Assist Metropolitan Water District of Southern California in meeting future water needs.
- Provide a more reliable water supply at virtually the same cost as imported water.
- Mitigate the effects of global warming.
- Improve our local water quality, over time.

For the above reasons, SBCCOG supports this project, and we look forward to seeing the Water Reliability 2020 Program become a reality.

Sincerely,

Steve Diels, SBCCOG Chair
Councilman, City of Redondo Beach

Carson, CA 90746-1296

Dear Mr. Wildermuth:

The City Council of the City of Culver City recently received a presentation on West Basin Municipal Water District's goals of the Water Reliability 2020 Program, a plan to increase local control of our water future.

The City Council understands the intent of the Water Reliability 2020 Program is to double our recycled water efforts, double our conservation program, increase our water education programs and add an estimated twenty million gallons-a-day of ocean-water desalination as a new locally controlled water supply. Water Reliability 2020 is estimated to increase local control of water supplies from one-third today to two-thirds by the year 2020. Increasing our water reliability is important to the continued vitality of our region.

West Basin's Water Reliability 2020 Program is anticipated to provide the following local benefits:

- Improve water reliability for the coastal area of Los Angeles.
- Protect the region from the negative impacts of future droughts.
- Establish an emergency supply should imported water be temporarily cut off for any reason.
- Reduce overall energy use through increasing conservation and recycling.
- Ease the strain on the Sacramento-San Joaquin Bay Delta.
- Assist Metropolitan Water District of Southern California in meeting future water needs.
- Provide a more reliable water supply at virtually the same cost as imported water.
- Mitigate the effects of global warming.
- Improve our local water quality, over time.

For the above reasons, you can count on the City of Culver City as a positive supporter of the intent of this project, and look forward to seeing the Water Reliability 2020 Program evolve.

Sincerely,

Andrew Weissman

West Basin Municipal Water District
17140 S. Avalon Blvd. Suite 210
Carson, CA 90746-1296

Dear Mr. Wildermuth:

Veolia Water North America recently received a presentation on West Basin Municipal Water District's Water Reliability 2020 Program, a plan to increase local control of our water future.

We understand the Water Reliability 2020 Program will triple our recycled water efforts, double our conservation program, increase our water education programs and add ocean-water desalination as a new locally controlled water supply. Water Reliability 2020 will increase our local control of our water supplies from one-third today to two-thirds by the year 2020. This increase in water reliability is key to the continued vitality of our region.

West Basin's Water Reliability 2020 Program will provide the following local benefits:

- Improved water reliability for the coastal area of Los Angeles.
- Protection from the negative impacts of future droughts.
- An emergency supply should imported water be temporarily cut off for any reason.
- Reduction of overall energy use through increasing conservation and recycling.
- Ease the strain on the Sacramento-San Joaquin Bay Delta.
- Assist Metropolitan Water District of Southern California meet future water needs.
- Provide a more reliable water supply at virtually the same cost as imported water.
- Mitigate the effects of global warming.
- Improve our local water quality, overtime.

For the above reasons, you can count on Veolia as a positive supporter of the project, and look forward to seeing the Water Reliability 2020 Program become a reality.

Sincerely,
