ST TAMMANY PARISH GOVERNMENT

2015 ANNUAL REPORT PROPOSALS - NON-FEDERAL INTERSESTS

## I. SELA STORM WATER PROJECTS

### A. SCHNEIDER CANAL LEVEE ALIGNMENT

1. Provide the name of all non-Federal interests planning to act as the sponsor, including any non-Federal interest that has contributed or is expected to contribute toward the non-Federal share of the proposed feasibility study or modification.

St. Tammany Parish Government

2. State if this proposal is for a feasibility study or a modification to an authorized USACE project or feasibility study and, if a modification, specify the authorized project or study.

Modification to a Proposed Study

3. State the project purpose of the proposed study or modification.

The modification to the study requests a revising the PMP to reduce the number of alternatives to be considered as well as the extent of investigations needed for this preliminary design phase. In addition, the modification requests that the project team investigate alternative alignments of the proposed levee to better fit with their related projects in the area.

1. Provide an estimate, to the extent practicable, of the total cost of the proposed study or modification.

Due to funding constraints, work on the Schneider Canal PMP has currently been suspended. There is not a project cost estimate for the modification at this time.

2. Describe, to the extent practicable, the anticipated monetary and non-monetary benefits of the proposal including benefits to the protection of human life and property; improvement to transportation; the national economy; the environment; or the national security interests of the United States.

The modification will provide the opportunity to fund the study as funding is not available to be utilized for use in St. Tammany Parish at this time.

3. Describe if local support exists for the proposal.

The project was first authorized under the original SELA authorization in the FY '96 Appropriations Act and the WRDA 1996, under Schneider Canal, Slidell Reconnaissance Report (May 1990). There is extensive local support as this project is reflective of the intense rainfall in the upper reaches of the streams and high stages in Lake Pontchartrain caused by hurricanes and other tropical events.

4. State if the non-Federal interest has the financial ability to provide for the required cost share.

St. Tammany Parish has the ability to provide or receive the funding for the required cost share.

5. Submit a letter or statement of support from each associated non-Federal interest.

Not Applicable only St. Tammany Parish Government.

**B. W-14**

1. Provide the name of all non-Federal interests planning to act as the sponsor, including any non-Federal interest that has contributed or is expected to contribute toward the non-Federal share of the proposed feasibility study or modification.

St. Tammany Parish Government

2. State if this proposal is for a feasibility study or a modification to an authorized USACE project or feasibility study and, if a modification, specify the authorized project or study.

Modification to an authorized USACE project

3. State the project purpose of the proposed study or modification.

The modification requests the removal of the Robert Boulevard Detention Pond portion of the project. Originally, the pond was to be deepened and widened. Due to funding constraints a modification is suggested. The modification is not intended to reduce the benefit of the overall project.

4. Provide an estimate, to the extent practicable, of the total cost of the proposed study or modification.

Due to funding constraints, the modification is being requested; however an exact cost estimate is unknown at this time.

5. Describe, to the extent practicable, the anticipated monetary and non-monetary benefits of the proposal including benefits to

the protection of human life and property; improvement to transportation; the national economy; the environment; or the national security interests of the United States.

The W-14 is a main canal running through the eastern portion of St. Tammany Parish. The benefits of the project include not only protection of human life due to rain events and storm events; but millions of dollars in benefit from the potential elimination and/or reduction of flooding within the area. The project will also have environmental impacts due to the control of water flow directly effecting the improvement of water quality downstream.

6. Describe if local support exists for the proposal.

Local funding exists for this project.

7. State if the non-Federal interest has the financial ability to provide for the required cost share.

St. Tammany Parish has the ability to provide or receive the funding for the required cost share.

8. Submit a letter or statement of support from each associated non-Federal interest.

Not Applicable only St. Tammany Parish Government.

## **II. STPG COASTAL MASTER PLAN PROJECTS – SEE ATTACHED**

1. Provide the name of all non-Federal interests planning to act as the sponsor, including any non-Federal interest that has contributed or is expected to contribute toward the non-Federal share of the proposed feasibility study or modification.

St. Tammany Parish Government

2. State if this proposal is for a feasibility study or a modification to an authorized USACE project or feasibility study and, if a modification, specify the authorized project or study.

Proposal for a feasibility study

3. State the project purpose of the proposed study or modification.

See attached St. Tammany Coastal Master Plan

4. Provide an estimate, to the extent practicable, of the total cost of the proposed study or modification.  
See attached St. Tammany Coastal Master Plan
5. Describe, to the extent practicable, the anticipated monetary and non-monetary benefits of the proposal including benefits to the protection of human life and property; improvement to transportation; the national economy; the environment; or the national security interests of the United States.  
See attached St. Tammany Coastal Master Plan
6. Describe if local support exists for the proposal.  
Local funding exists for this project.
7. State if the non-Federal interest has the financial ability to provide for the required cost share.  
St. Tammany Parish has the ability to provide or receive the funding for the required cost share.
8. Submit a letter or statement of support from each associated non-Federal interest.  
Not Applicable only St. Tammany Parish Government.

## **II. STPG WATER QUALITY PROJECTS – SEE ATTACHED**

1. Provide the name of all non-Federal interests planning to act as the sponsor, including any non-Federal interest that has contributed or is expected to contribute toward the non-Federal share of the proposed feasibility study or modification.  
St. Tammany Parish Government
2. State if this proposal is for a feasibility study or a modification to an authorized USACE project or feasibility study and, if a modification, specify the authorized project or study.  
Proposal for a feasibility study.
3. State the project purpose of the proposed study or modification.  
See attached St. Tammany Storm Water Pond Projects

4. Provide an estimate, to the extent practicable, of the total cost of the proposed study or modification.

See attached St. Tammany Storm Water Pond Projects

5. Describe, to the extent practicable, the anticipated monetary and non-monetary benefits of the proposal including benefits to the protection of human life and property; improvement to transportation; the national economy; the environment; or the national security interests of the United States.

See attached St. Tammany Storm Water Pond Projects

6. Describe if local support exists for the proposal.

Local funding exists for this project.

7. State if the non-Federal interest has the financial ability to provide for the required cost share.

St. Tammany Parish has the ability to provide or receive the funding for the required cost share.

8. Submit a letter or statement of support from each associated non-Federal interest.

Not Applicable only St. Tammany Parish Government.
