

## DOD AREA COST FACTORS (ACF)

### PAX Newsletter No 3.2.1 Revision-1, dated 21 Mar 12 to PAX Newsletter 3.2.1, 19 Jan 12, TABLE – B, PART I and II (US and Overseas Locations)

1. This revision to the 19 Jan 2012 Area Cost Factors (ACF) Table, PAX Newsletter 3.2.1 (Interim) adds OCONUS ACF Indexes only. CONUS locations ACF values indicated in the 19 Jan 2012 Interim PAX Newsletter did NOT Change. This updated PAX Newsletter 3.2.1 shall be used, along with Primary Facilities Unit Costs from the latest issue of the Army PAX Newsletter No 3.2.2, in preparation and review of FY **2014-15** Military Construction, Army (MCA) and Army Family Housing (AFH) projects' DD Forms 1391 and ENG Form 3086 (budget cost estimates). These factors are **NOT** intended for use to develop and/or modify individual facilities Sustainment Costs, detailed Quantity-Take-offs, Unit Price Book (UPB) line items, Commercial cost data, or **User Generated** unit costs (to include Support Facilities Unit Costs). These other cost estimating systems and databases have their own processes and factors for adjusting costs to different locations. This Newsletter is published and maintained on the web at <http://www.usace.army.mil/CostEngineering.aspx>
2. The ACF for each location reflects the relative relationship of construction costs at that location to the National average of ACF=1, determined from a 2011 CONUS construction market survey of 96 Base Cities (two cities per State) plus an additional 130+ CONUS locations' average construction costs. In general, the ACF index is developed based on the local construction costs for a market basket of 8 Labor Crafts, 17 Construction Materials, 4 Equipment items, and seven (7) other Matrix Factors that reflect local conditions affecting construction costs, such as weather, climatic (frost zone, wind load), seismic, contractor overhead and profit, life support and mobilization, labor availability and labor productivity. The selected labor, materials, and equipment (LME) items are representative of the types of products and services used to construct most military facilities.
3. The overall ACF of the state should be used when there is no specific ACF for a location within the state. The ACF for the closest location should be used only when market conditions (e.g. material prices, labor rates, labor availability, bidding climate) are similar.
4. ACF for some locations has been updated from the previous list utilizing the latest data input from the Services' and field offices (Districts). There is no easy correlation between the current ACF and the previous ACF for a specific location. No common benchmark exists because both the Base City average and the relationships between cities may change from year to year. It is possible, however, to compare differences between several locations in this database with differences between the same locations in previous databases.
5. Currency Exchange Rates for all OCONUS locations are quoted at the exchange rate on 1 Oct 2011. 2012 DOD published currency exchange rates were used for countries that are listed in the DOD Currency Exchange Rate memorandum.
6. Point of contacts for this Newsletter at Headquarters, US Army Corps of Engineers are: Mr. Ami Ghosh, phone (202)-761-7503, DSN 763-7503, e-mail [amitava.ghosh@usace.army.mil](mailto:amitava.ghosh@usace.army.mil), and Mr. Raymond Lynn, phone (202)-761-5887, DSN 763-5887, e-mail [Raymond.L.Lynn@usace.army.mil](mailto:Raymond.L.Lynn@usace.army.mil)
