

CECW-EH-D

**DEPARTMENT OF THE ARMY
U.S. Army Corps of Engineers
Washington, DC 20314-1000**

EM 1110-2-1614

Manual
No. 1110-2-1614

30 June 1995

**Engineering and Design
DESIGN OF COASTAL REVETMENTS, SEAWALLS, AND BULKHEADS**

Table of Contents

Subject	Paragraph	Page	Subject	Paragraph	Page																																																																																																																		
Chapter 1																																																																																																																							
Introduction																																																																																																																							
Purpose	1-1	1-1	Freeze-Thaw Cycles	2-23	2-17																																																																																																																		
Applicability	1-2	1-1	Marine Borer Activity	2-24	2-18																																																																																																																		
References	1-3	1-1	Ultraviolet Light	2-25	2-18																																																																																																																		
Background	1-4	1-1	Abrasion	2-26	2-18																																																																																																																		
Discussion	1-5	1-1	Vandalism and Theft	2-27	2-18																																																																																																																		
Chapter 2																																																																																																																							
Functional Design																																																																																																																							
Shoreline Use	2-1	2-1	Geotechnical Considerations	2-28	2-18																																																																																																																		
Shoreline Form and Composition	2-2	2-1	Wave Forces	2-29	2-18																																																																																																																		
Seasonal Variations of Shoreline Profiles	2-3	2-1	Impact Forces	2-30	2-20																																																																																																																		
Design Conditions for Protective Measures	2-4	2-1	Ice Forces	2-31	2-20																																																																																																																		
Design Water Levels	2-5	2-1	Hydraulic Model Tests	2-32	2-20																																																																																																																		
Design Wave Estimation	2-6	2-2	Two-Dimensional Models	2-33	2-20																																																																																																																		
Wave Height and Period Variability and Significant Waves	2-7	2-2	Three-Dimensional Models	2-34	2-20																																																																																																																		
Wave Gauges and Visual Observations	2-8	2-3	Previous Tests	2-35	2-21																																																																																																																		
Wave Hindcasts	2-9	2-4	Chapter 3																																																																																																																				
Wave Forecasts	2-10	2-4	Revetments																																																																																																																				
Breaking Waves	2-11	2-4	Height of Protection	2-12	2-4	General	3-1	3-1	Wave Runup	2-13	2-4	Armor Types	3-2	3-1	Wave Overtopping	2-14	2-6	Design Procedure Checklist	3-3	3-1	Stability and Flexibility	2-15	2-8	Chapter 4			Armor Unit Stability	2-16	2-8	Seawalls			Layer Thickness	2-17	2-10	Reserve Stability	2-18	2-10	General	4-1	4-1	Toe Protection	2-19	2-11	Concrete Seawalls	4-2	4-1	Filters	2-20	2-12	Rubble-Mound Seawalls	4-3	4-1	Flank Protection	2-21	2-16	Design Procedure Checklist	4-4	4-1	Corrosion	2-22	2-16	Chapter 5						Bulkheads									General	5-1	5-1				Structural Forms	5-2	5-1				Design Procedure Checklist	5-3	5-1				Chapter 6						Environmental Impacts									General	6-1	6-1				Physical Impacts	6-2	6-1
Height of Protection	2-12	2-4	General	3-1	3-1																																																																																																																		
Wave Runup	2-13	2-4	Armor Types	3-2	3-1																																																																																																																		
Wave Overtopping	2-14	2-6	Design Procedure Checklist	3-3	3-1																																																																																																																		
Stability and Flexibility	2-15	2-8	Chapter 4																																																																																																																				
Armor Unit Stability	2-16	2-8	Seawalls																																																																																																																				
Layer Thickness	2-17	2-10	Reserve Stability	2-18	2-10	General	4-1	4-1	Toe Protection	2-19	2-11	Concrete Seawalls	4-2	4-1	Filters	2-20	2-12	Rubble-Mound Seawalls	4-3	4-1	Flank Protection	2-21	2-16	Design Procedure Checklist	4-4	4-1	Corrosion	2-22	2-16	Chapter 5						Bulkheads									General	5-1	5-1				Structural Forms	5-2	5-1				Design Procedure Checklist	5-3	5-1				Chapter 6						Environmental Impacts									General	6-1	6-1				Physical Impacts	6-2	6-1																																	
Reserve Stability	2-18	2-10	General	4-1	4-1																																																																																																																		
Toe Protection	2-19	2-11	Concrete Seawalls	4-2	4-1																																																																																																																		
Filters	2-20	2-12	Rubble-Mound Seawalls	4-3	4-1																																																																																																																		
Flank Protection	2-21	2-16	Design Procedure Checklist	4-4	4-1																																																																																																																		
Corrosion	2-22	2-16	Chapter 5																																																																																																																				
			Bulkheads																																																																																																																				
						General	5-1	5-1				Structural Forms	5-2	5-1				Design Procedure Checklist	5-3	5-1				Chapter 6						Environmental Impacts									General	6-1	6-1				Physical Impacts	6-2	6-1																																																																								
			General	5-1	5-1																																																																																																																		
			Structural Forms	5-2	5-1																																																																																																																		
			Design Procedure Checklist	5-3	5-1																																																																																																																		
			Chapter 6																																																																																																																				
			Environmental Impacts																																																																																																																				
						General	6-1	6-1				Physical Impacts	6-2	6-1																																																																																																									
			General	6-1	6-1																																																																																																																		
			Physical Impacts	6-2	6-1																																																																																																																		

Subject	Paragraph	Page	Subject	Paragraph	Page
Water Quality Impacts	6-3	6-1	Appendix C		
Biological Impacts	6-4	6-1	Seawalls		
Short-term Impacts	6-5	6-2			
Long-term Impacts	6-6	6-2	Appendix D		
Socioeconomic and Cultural Impacts	6-7	6-2	Bulkheads		
Evaluation of Alternatives	6-8	6-2	Appendix E		
			Sample Problem

Glossary

List of Figures

Figure	Page	Figure	Page
2-1 Monthly lake level forecast	2-3	B-16 Gobi block revetment cross section	B-10
2-2 Design breaker height	2-5	B-17 Turf block revetment, Port Wing, WI	B-11
2-3 Surf parameter and breaking wave types	2-6	B-18 Turf block revetment cross section	B-11
2-4 Revetment toe protection	2-13	B-19 Nami Ring revetment, Little Girls Point, MI	B-12
2-5 Seawall and bulkhead toe protection	2-14	B-20 Nami Ring revetment cross section	B-12
2-6 Toe aprons for sheet-pile bulkheads	2-15	B-21 Concrete construction block revetment, Fontainebleau State Park, LA	B-13
2-7 Value of N_s , toe protection design for vertical walls	2-15	B-22 Concrete construction block revetment cross section	B-13
2-8 Use of filter cloth under revetment and toe protection stone	2-16	B-23 Detail of erosion of concrete control blocks	B-14
2-9 Breaking wave pressures on a vertical wall	2-19	B-24 Concrete control block revetment, Port Wing, WI	B-14
2-10 Wave pressure from broken waves	2-20	B-25 Concrete control block revetment cross section	B-15
3-1 Typical revetment section	3-1	B-26 Shiplap block revetment, Benedict, MD	B-15
3-2 Summary of revetment alternatives	3-2	B-27 Shiplap block revetment cross section	B-16
4-1 Typical concrete seawall sections	4-1	B-28 Lok-Gard block revetment, Jensen Beach Causeway, FL	B-16
4-2 Summary of seawall alternatives	4-1	B-29 Lok-Gard block revetment cross section	B-17
5-1 Summary of bulkhead alternatives	5-2	B-30 Terrafix block revetment, Two Mile, FL	B-17
B-1 Quarystone revetment at Tawas Point, Michigan	B-1	B-31 Terrafix block revetment cross section	B-18
B-2 Quarystone revetment cross section	B-1	B-32 Fabriflorm revetment, location unknown	B-18
B-3 Large stone overlay revetment at Oahe Reservoir, SD	B-2	B-33 Fabriflorm revetment cross section	B-19
B-4 Large stone overlay revetment cross section	B-3	B-34 Bag revetment at Oak Harbor, WA	B-20
B-5 Field stone revetment at Kekaha Beach, Kauai, HI	B-3	B-35 Bag revetment cross section	B-20
B-6 Field stone revetment cross section	B-4	B-36 Gabion revetment, Oak Harbor, WA	B-22
B-7 Broken concrete revetment at Shore Acres, TX	B-5	B-37 Gabion revetment cross section	B-22
B-8 Broken concrete revetment cross section	B-5	B-38 Steel fuel barrel revetment, Kotzebue, AK	B-23
B-9 Asphaltic concrete revetment cross section	B-6	B-39 Steel fuel barrel revetment plan and cross section	B-23
B-10 Concrete tribars (armor unit) test section at CERC, Fort Belvoir, VA	B-7	B-40 Fabric revetments, Fontainebleau State Park, LA	B-25
B-11 Concrete tribar revetment cross section	B-7	B-41 Fabric revetment cross section	B-25
B-12 Formed concrete revetment, Pioneer Point, MD	B-8		
B-13 Formed concrete revetment cross section	B-8		
B-14 Concrete revetment blocks	B-9		
B-15 Gobi block revetment, Holly Beach, LA	B-10		

Figure	Page	Figure	Page
B-42 Concrete slab revetment, Alameda, CA	B-26	D-10 Railroad ties and steel H-pile bulkhead, Port Wing, WI	D-7
B-43 Concrete slab revetment cross section	B-26	D-11 Railroad ties and steel H-pile bulkhead cross section	D-7
B-44 Soil cement revetment, Bonny Dam, CO	B-27	D-12 Treated timber bulkhead, Oak Harbor, WA	D-8
B-45 Soil cement revetment cross section . . .	B-27	D-13 Treated timber bulkhead cross section	D-8
B-46 Tire mattress revetment, Fontainebleau State Park, LA	B-28	D-14 Untreated log bulkhead, Oak Harbor, WA	D-9
B-47 Tire mattress revetment cross section	B-28	D-15 Untreated log bulkhead cross section	D-9
B-48 Landing mat revetment	B-28	D-16 Hogwire fence and sandbag bulkhead, Basin Bayou Recreation Area, FL	D-10
B-49 Windrow revetment	B-29	D-17 Hogwire fence and sandbag bulkhead cross section	D-10
B-50 Protective vegetative plantings	B-30	D-18 Used rubber tire and timber post bulkhead, Oak Harbor, WA	D-11
C-1 Curved-face seawall Galveston, TX	C-1	D-19 Used rubber tire and timber post bulkhead cross section	D-11
C-2 Curved-face seawall cross section	C-1	D-20 Timber crib bulkhead cross section	D-12
C-3 Stepped-face seawall, Harrison County, MS	C-2	D-21 Stacked rubber tire bulkhead, Port Wing, WI	D-12
C-4 Stepped-face seawall cross section	C-2	D-22 Stacked rubber tire bulkhead cross section	D-13
C-5 Combination stepped- and curved-face seawall, San Francisco, CA	C-3	D-23 Used concrete pipe bulkhead, Beach City, TX	D-13
C-6 Combination stepped- and curved-face seawall cross section	C-3	D-24 Used concrete pipe bulkhead cross section	D-14
C-7 Rubble-mound seawall, Fernandina Beach, FL	C-4	D-25 Longard tube bulkhead, Ashland, WI	D-15
C-8 Rubble-mound seawall cross section	C-4	D-26 Longard tube bulkhead cross section	D-15
D-1 Sheet-pile bulkhead, Lincoln Township, MI	D-2	D-27 Stacked bag bulkhead cross section	D-16
D-2 Steel sheet-pile bulkhead cross-section	D-2	D-28 Gabion bulkhead, possibly in Sand Point, MI	D-16
D-3 Timber sheet-pile bulkhead, possibly at Fort Story, VA	D-3	D-29 Gabion bulkhead cross section	D-16
D-4 Construction details of timber sheet pile bulkhead	D-3	E-1 Site conditions for sample problem	E-1
D-5 Aluminum sheet-pile bulkhead cross section	D-4	E-2 Revetment section alternatives	E-6
D-6 Concrete sheet-pile bulkhead, Folly Beach, SC	D-4	E-3 Bulkhead section alternatives	E-8
D-7 Cellular steel sheet-pile bulkhead, plan and cross section	D-5		
D-8 Concrete slab and king-pile bulkhead	D-5		
D-9 Concrete slab and king-pile bulkhead cross section	D-6		

List of Tables

Table		Page	Table		Page
2-1	Relationships Among T_p , T_s , and T_z	2-4	E-4	Site Preparation Costs for Revetment Alternative	E-9
2-2	Rough Slope Runup Correction Factors	2-7	E-5	Material Costs for Armor Stone Revetment Alternative	E-9
2-3	Suggested Values for Use in Determining Armor Weight (Breaking Wave Conditions)	2-9	E-6	Material Costs for Concrete Block Revetment Alternative	E-10
2-4	Layer Coefficients and Porosity for Various Armor Units	2-11	E-7	Material Costs for Gabion Revetment Option	E-10
2-5	$H/H_{D=0}$ for Cover Layer Damage Levels for Various Armor Types	2-11	E-8	Material Costs for Soil-Cement Revetment Option	E-10
2-6	Galvanic Series in Seawater	2-17	E-9	Summary of Initial Costs for the Revetment Options	E-10
6-1	Environmental Design Considerations for Revetments, Seawalls, and Bulkheads	6-3	E-10	Material Costs for Steel Sheetpile Bulkhead Option	E-11
B-1	Shiplap Block Weights	B-15	E-11	Material Costs for Railroad Ties and Steel H-Pile Bulkhead Option	E-11
E-1	Predicted Runup and Required Crest Elevations for Sample Revetments Options	E-5	E-12	Material Costs for Gabion Bulkhead Option	E-12
E-2	Estimated Toe Scour Depths for Sample Revetment Options	E-5	E-13	Summary of Initial Costs for the Bulkhead Options	E-12
E-3	Summary of Revetment Design Options	E-7	E-14	Summary of Annual Costs for Revetment and Bulkhead Options	E-12
