

**DEPARTMENT OF THE ARMY
U.S. Army Corps of Engineers
Washington, DC 20314-1000**

EM 1110-2-2301

CECW-EG

Manual
No. 1110-2-2301

30 September 1994

**Engineering and Design
TEST QUARRIES AND TEST FILLS**

Table of Contents

Subject	Paragraph	Page	Subject	Paragraph	Page
Chapter 1 Introduction			Geophysical Investigations	4-3	4-1
Purpose	1-1	1-1	Subsurface Explorations	4-4	4-1
Applicability	1-2	1-1			
References	1-3	1-1			
Scope	1-4	1-1	Chapter 5 Laboratory Testing		
General Considerations	1-5	1-1	General	5-1	5-1
Test Quarry Justification	1-6	1-1	Petrographic Examination	5-2	5-1
PART 1 Test Quarries			Weight/Volume Properties	5-3	5-1
Chapter 2 Investigation Stages			Strength Tests	5-4	5-1
Project Development Phases and Associated Geotechnical Investigations	2-1	2-1	Rock Durability Tests	5-5	5-1
Reconnaissance Study Phase	2-2	2-1			
Feasibility Study Phase	2-3	2-1			
Preconstruction Engineering and Design Phase	2-4	2-1	Chapter 6 Location and Design of Test Quarries		
Construction Phase	2-5	2-1	General	6-1	6-1
Operations Phase	2-6	2-2	Evaluation of Project Rock Production Requirements	6-2	6-1
Chapter 3 Regional Investigations and Site Reconnaissance			Evaluation of Potential Test Quarry Sites	6-3	6-1
General	3-1	3-1	Test Quarry Layouts	6-4	6-2
Initial Regional Geology Studies	3-2	3-1	Gradation Measurements	6-5	6-9
Field Reconnaissance	3-3	3-1	Deterioration and Incipient Fracture Examination	6-6	6-12
Survey of Existing Excavations	3-4	3-1	Rock Processing	6-7	6-13
Chapter 4 Field Investigations					
General	4-1	4-1	Chapter 7 Test Quarry Operations		
Geologic Mapping	4-2	4-1	Supervision	7-1	7-1
			Safety Considerations	7-2	7-1
			Modification of Design	7-3	7-1
			Blasting Plans	7-4	7-1
			Slope Mapping and Presplitting Observations	7-5	7-2
			Rock Quality and Pre-Test Fill Gradations	7-6	7-3

Subject	Paragraph	Page	Subject	Paragraph	Page
Rock Processing Results	7-7	7-3	Chapter 11		
Report	7-8	7-4	Measurements and Observations		
PART 2					
TEST FILLS					
Chapter 8					
General Considerations					
Background	8-1	8-1	General	11-1	11-1
Why a Test Fill?	8-2	8-1	Densification	11-2	11-1
Representative Procedures	8-3	8-3	Gradation Tests	11-3	11-4
Test-Fill Scheduling	8-4	8-3	Percolation Tests	11-4	11-5
Flexibility	8-5	8-3	Other Tests	11-5	11-9
Chapter 9					
Planning and Design					
General	9-1	9-1	Visual Observations	11-6	11-10
Location of the Test Fill	9-2	9-1	Inspection Trenches or Pits	11-7	11-10
Geometry	9-3	9-1			
Test Sections or Lanes	9-4	9-1			
Equipment	9-5	9-2			
Chapter 10					
Test Fill Construction					
Foundation Preparation	10-1	10-1			
Placement of Hard to Medium Rock	10-2	10-1			
Placement of Soft Rock	10-3	10-4			
Rockfill Versus Soil	10-4	10-5			
Use of Water	10-5	10-5			
Compaction and Compaction Equipment	10-6	10-6			
Chapter 11					
Measurements and Observations					
General	11-1	11-1			
Densification	11-2	11-1			
Gradation Tests	11-3	11-4			
Percolation Tests	11-4	11-5			
Other Tests	11-5	11-9			
Visual Observations	11-6	11-10			
Inspection Trenches or Pits	11-7	11-10			
Chapter 12					
Evaluation of Test Fill Results					
General	12-1	12-1			
Settlement Data	12-2	12-1			
Roller Passes	12-3	12-1			
Gradation Data	12-4	12-1			
In Situ Density Data	12-5	12-1			
Inspection Trench	12-6	12-5			
Test Fill Report	12-7	12-9			
Appendix A					
References					
Appendix B					
Vibratory Roller Information					
Appendix C					
List of Symbols
