

TECHNICAL MANUAL
No. 5-650

HEADQUARTERS
DEPARTMENT OF THE ARMY

CENTRAL BOILER PLANTS

Approved for public release; distribution is unlimited.

	Paragraph	Page
CHAPTER 1.		
Section I.		
GENERAL CONSIDERATIONS		
Introduction		
Purpose	1-1	1-1
Central Boiler Plants	1-2	1-1
Equipment	1-3	1-5
Section II.		
Elementary Combustion Principles		
Fossil Fuels	1-4	1-6
Combustion	1-5	1-6
Combustion of Coal.....	1-6	1-8
Combustion of Oil	1-7	1-13
Combustion of Natural Gas	1-8	
Soot and Smoke	1-9	1-13
Flue Gas Analysis and Temperature	1-10	1-15
Combustion Efficiency	1-11	1-15
Boiler Efficiency.	1-12	1-17
Central Boiler Plant Efficiency	1-13	1-17
Section III.		
Principles of Steam and Hot Water Generation		
Basic Principles	1-14	1-23
Heat Transfer	1-15	1-23
CHAPTER 2.		
	DESCRIPTION OF EQUIPMENT	
Section I.		
Boilers and Heat Exchangers		
Boiler Classifications	2-1	2-1
Boiler Design Requirements	2-2	
Fabrication.....	2-3	2-1
Fire Tube Boilers	2-4	2-2
Water Tube Boilers	2-5	2-2
Hot Water Generators	2-6	2-13
Economizers.....	2-7	2-13
Air Heaters.....	2-8	2-13
Section II.		
Boiler Accessories and Fittings		
ASME Requirements	2-9	2-19
Gage Glass, Gage Cocks	2-10	2-19
Water Columns	2-11	2-19
Pressure Gage, Temperature Gage	2-12	2-19
Safety Valves	2-13	2-24
Boiler Outlet Valves	2-14	2-27
Blowoff Valves and Piping.	2-15	2-27
Fusible Plugs	2-16	2-27
Sootblowers	2-17	2-31
Section III.		
Fuel- Handling and Combustion Equipment		

Figure No.	Title	Page
1-4	Combustion of Oil	1-12
1-5	Combustion of Coal	1-14
1-6	Combustion Efficiency Motor	1-16
1-7	Elementary Boiler	1-24
1-8	Water Circulation	1-28
1-9	Effects of Soot and Scale on Heat Transfer	1-29
2-1	Tube Expander	2-3
2-2	Flared and Beaded Tubes	2-3
2-3	Scotch Boiler	2-3
2-4	Two, Three, and Four Pass Scotch Boiler Designs	2-4
2-5	Horizontal Return Tubular Boiler	2-5
2-6	Four Drum Water Tube Boiler	2-6
2-7	Refractory Expansion Joints	2-8
2-8	Water Wall Construction	2-9
2-9	Steam Drum Internals	2-10
2-10	Superheater in Two Drum Boiler	2-11
2-11	Package Boiler Configurations	2-12
2-12	D Package Boiler	2-12
2-13	Hot Water Generator	2-14
2-14	Hot Water End Uses	2-15
2-15	Hot Water Distribution	2-16
2-16	Bare Tube Economizer	2-17
2-17	Extended Surface Economizer	2-17
2-18	Cold End Corrosion - Minimum Metal Temperatures	2-18
2-19	Tubular Air Heater	2-20
2-20	Regenerative Air Heater	2-21
2-21	Water Gage Glass	2-22
2-22	Water Column	2-23
2-23	Safety Valve Installation	2-25
2-24	Huddling Chamber Safety Valve	2-26
2-25	Outside Screw and Yoke Gate Valve	2-28
2-26	Non-Return Valve	2-29
2-27	Slow-Opening Blowdown Valve Set	2-30
2-28	Fire Tube Cleaning System	2-32
2-29	Fixed Position Mechanical Sootblower	2-33
2-30	Underfeed Stoker	2-355
2-31	Power Dump Grate Spreader Stoker	2-37
2-32	Underfeed Spreader	2-38
2-33	Traveling Chain Grate Stoker	2-33
2-34	Vibrating Grate Stoker	2-34
2-35	Fluidized Bed Fire Tube Boiler	2-42
2-36	Coal Handling System	2-44
2-37	Types of Bucket Elevators	2-46
2-38	Weigh Larry	2-47
2-39	Pneumatic Ash Handling System	2-48
2-40	Hydraulic Ash Handling System	249
2-41	Steam Atomizer	2-51
2-42	Rotary Atomizer	2-52
2-43	Register Burner	2-54
2-44	Low Excess Air Burner	2-55
245	Arrangement of Above-Ground Fuel Oil Tank	2-56
2-46	Underground Fuel Oil Storage Tank	2-57

Figure No.	Title	Page
2-47	Fuel Oil Pumping and Heating Equipment	2-58
2-48	Safety Equipment Oil-Fired Water Tube Boiler	2-59
2-49	Safety Equipment Oil- or Gas-Fire Tube Boiler	2-60
2-50	Safety Equipment Gas-Fired Water Tube Boiler	2-62
2-51	Positive Displacement Feedwater Regulator	2-63
2-52	Vapor-Generator/Thermohydraulic Feedwater Regulator	2-64
2-53	Thermostatic/Metal Expansion Feedwater Regulator	2-66
2-54	Two Element Feedwater Controls	2-67
2-55	Control Valve with Pneumatic Actuator	2-69
2-56	Control Valve with Pneumatic Actuator and Positioner	2-70
2-57	Steam Pressure Control System	2-71
2-58	Proportional Control	2-71
2-59	Proportional Response	2-72
2-60	Proportional Plus Integral Response	2-72
2-61	Basic Pneumatic Controller	2-74
2-62	Pneumatic Booster Relay	2-74
2-63	Parallel Positioning Control System	2-75
2-64	Series/ Parallel Control	2-77
2-65	Jackshaft Control System	2-77
2-66	Parallel Metering System	2-78
2-67	Oxygen Trim Control System	2-79
2-68	Electronic Programming Control in a Boiler Panel	2-81
2-69	Float/ Magnet Low-Water Fuel Cutoff	2-82
2-70	Electrode Type Low-Water Fuel Cutoff	2-83
2-71	Bourdon-Tube Pressure Switch	2-83
2-72	Diaphragm Pressure Switch	2-84
2-73	Temperature Switch	2-84
2-74	U-V Flame Scanner	2-85
2-75	Annunciator	2-85
2-76	Air-Flow Steam-Flow Meter	2-86
2-77	Direct-Acting Temperature Regulator	2-88
2-78	Pilot-Operated Temperature Control Valve	2-89
2-79	Pilot-Operated Pressure-Reducing Valve	2-90
2-80	Diaphragm Actuator Pressure-Reducing Valve	2-91
2-81	Self-Contained Diaphragm Pressure-Reducing Valve	2-92
2-82	Differential Pressure-Reducing Valve	2-94
2-83	Steam Differential Pressure-Reducing Valve	2-95
2-84	Orifice, Flow Nozzle, and Venturi	2-96
2-85	Steam Flow Recorder	2-97
2-86	Pneumatic Differential Pressure Transmitter	2-98
2-87	Rotameter	2-99
2-88	Positive Displacement Meter	2-100
2-89	Turbine Meter	2-101
2-90	Bourdon-Tube Pressure Gage	2-102
2-91	Opposed Bellows Differential Pressure Gage	2-103
2-92	Inclined U-Tube Manometer	2-105
2-93	Diaphragm Draft Gage	2-106
2-94	Zirconium Oxide Oxygen Analyzer	2-107
2-95	Recording Thermometer	2-108
2-96	Strip Chart Recorder	2-109
2-97	Medium Efficiency Cyclone Configuration	2-116

	Paragraph	Page	
Section IV	Coal Combustion Equipment	2-18	2-34
	Coal-Handling Equipment	2-19	2-43
	Ash-Handling Equipment	2-20	2-45
	Oil-Firing Equipment	2-21	2-50
	Oil Storage and Handling	2-22	2-53
	Gas-Firing Equipment	2-23	2-53
	Liquified Petroleum Gas	2-24	2-62
Section V.	Controls and Instrumentation		
	Feedwater-Drum Level Controls	2-25	2-62
	Combustion Controls	2-26	2-65
	Boiler Safety Control	2-27	2-76
	Additional Controls and Instrumentation	2-28	2-89
	Water Treatment Control	2-29	2-110
Section VI.	Pollution Control Equipment		
	Pollution Regulations.....	2-30	2-110
	Types of Pollutants and Control Methods	2-31	2-110
	Mechanical Collectors	2-32	2-112
	Fabric Filters	2-33	2-120
	Electrostatic Precipitators	2-34	2-123
	Wet Scrubbers	2-35	2-125
CHAPTER 3.	Auxiliary Equipment		
Section I.	Feedwater Heaters	2-36	2-125
	Pumps and Injectors	2-37	2-125
	Forced Draft Fans	2-38	2-135
	Induced Draft Fans	2-39	2-137
	Stacks, Flues, and Ducts	2-40	2-137
	Steam Turbines.....	2-41	2-140
	Electric Motors	2-42	2-140
	Electrical Equipment	2-43	2-140
	Variable Speed Drives	2-44	2-140
	Air Compressors	2-45	2-142
	Steam Traps	2-46	2-142
	Piping Systems.	2-47	2-145
Section II.	OPERATION		
	Preliminary Operating Procedures		
	Plant Operation Considerations	3-1	3-1
	Standing Operating Procedures	3-2	3-1
	Daily and Monthly Boiler Plant Operating Logs.....	3-3	3-1
	Inspection	3-4	3-1
	Applicable Codes	3-5	3-1
	Basis for Comments	3-6	3-1
	Preparation for Startup	3- 7	3-4
	Starting Fire	3-8	3-4
	Warm-up Time	3-9	3-5
	Placing a High Pressure Steam Boiler in Service	3-10	3-6
	Placing a Hot Water Boiler in Service	3-11	3-7
	Operating Adjustments and Procedures		
	Boiler Operation.	3-12	3-8
	Maintaining Pressure or Temperature	3-13	3-8
	Feedwater and Boiler Water Treatment	3-14	3-8

	Paragraph	Page	
Section III.	Controlling Feedwater	3-15	3-8
	Boiler Accessories	3-16	3-8
	Coal Firing Procedures	3-17	3-10
	Oil Firing Procedures	3-19	3-13
	Combustion Controls	3-20	3-15
	Boiler Safety Controls	3-21	3-15
	Centrifugal Pumps	3-22	3-16
	Direct-Acting Pumps	3-23	3-16
	Injectors	3-24	3-18
	Fans	3-25	3-18
	Feedwater Heating and Treatment	3-26	3-18
	Economizers, Air Heaters and Pollution Control Equipment	3-27	3-19
	Emergency Procedure-Abnormal Water Level	3-18	3-19
	Emergency Procedure-Boiler Tube Failure	3-29	3-19
	Emergency Procedure - Fan Failure	3-30	3-20
	Emergency Procedure - Electric System Failure	3-31	3-20
	Emergency Procedure - Flame Failure	3-32	3-21
	Removing a Boiler from Service	3-33	3-21
	Optimizing Central Plant Efficiency	3-22	
	Optimizing Combustion Efficiency	3-34	3-22
	Optimizing Boiler Efficiency	3-35	3-24
	Optimizing Central Boiler Plant Efficiency	3-36	3-24
CHAPTER 4.	WATER TREATMENT FOR BOILER PLANTS		
Section I.	Introduction	4-1	
	Objectives of Water Treatment	4-1	4-1
	Impurities in Water	4-2	4-1
	Results and Reactions of Boiler Water Impurities	4-3	4-5
	Controlling Impurities	4-4	4-6
	Treatment Requirements	4-5	4-8
Section II.	Equipment and Chemicals	4-10	
	External Treatment Equipment	4-6	4-10
	Internal Treatment	4-7	
	Blowdown	4-8	
Section III.	Operation	4-33	
	Boiler Water Treatment Operating Log	4-9	4-33
	Procurement of Standard and Special Treatment Chemicals	4-10	4-33
	Care and Mixing of Treatment Chemicals	4-11	4-37
	Initial Flushing and Cleaning	4-12	4-37
	Flushing and Cleaning of Scaled and Corroded Boilers	4-13	4-38
	Sampling	4-14	4-38
	Chemical Analysis	4-15	4-40
	General Operation of External Treatment Equipment	4-16	4-41
	General Operation of Internal Treatment Equipment	4-17	4-51
	Safety Precautions	4-18	4-56
	Care of Idle Steel Boilers	4-19	4-56
CHAPTER 5.	INSPECTION AND PREVENTIVE MAINTENANCE		
Section I.	Introduction	5-1	
	Purpose and Scope	5-1	5-1
	Types of Maintenance	5-2	5-1

	Paragraph	Page	
Section II.	Responsibility	5-3	5-1
	Inspection	5-4	5-1
	Housekeeping	5-5	5-1
	Utilities Inspection and Service Records	5-6	5-1
	Tools	5-7	5-3
	Spare Parts	5-8	5-3
	Special Supplies	5-9	5-3
	Scheduled Preventive Maintenance		5-5
	Scheduling and Use of The Information	5-10	5-5
	Boilers	5-11	5-5
	Economizers	5-12	5-8
	Air Heaters	5-13	5-9
	Water Columns	5-14	5-9
	Safety Valves	5-15	5-9
	Fusible Plugs	5-16	5-10
	Sootblowers	5-17	5-10
	Stokers	5-18	5-10
	Pulverized Coal Equipment	5-19	5-10
	Coal Handling Equipment	5-20	5-10
	Ash Handling Equipment	5-21	5-11
	Oil Burners	5-22	5-11
	Oil Handling Equipment	5-23	5-11
	Gas Burners	5-24	5-11
	Feedwater Drum Level Controls	5-25	5-11
	Combustion Controls	5-26	5-12
	Boiler Safety Controls	5-27	5-12
Instrumentation	5-28	5-12	
Mechanical Collectors	5-29	5-12	
Stacks	5-30	5-12	
Zeolite Water Softeners	5-31	5-13	
Hot Lime-Soda Softeners	5-32	5-13	
Degaerating Heaters and Degraders	5-33	5-13	
Pumps	5-34	5-14	
Centrifugal Pumps	5-35	5-14	
Reciprocating Pumps	5-36	5-14	
Steam Injectors	5-37	5-15	
Steam Turbine (Non-Condensing)	5-38	5-15	
Air Compressors	5-39	5-15	
Steam Traps	5-40	5-16	
Electric Motors	5-41	5-16	
Forced-Draft and Induced-Draft Fans	5-42	5-16	
Command Inspections	5-43	5-17	
Technical Inspection	5-44	5-17	
Major Army Command Inspections	5-45	5-17	
APPENDIX A.	REFERENCES	A-1	A-1
APPENDIX B.	CHEMICAL ANALYSIS PROCEDURES		
	External Treatment Plants	B-1	A-3
	Boiler Water	B-2	A-4
	Miscellaneous Tests	B-3	A-10

	Paragraph	Page
APPENDIX C.		
HEAT BALANCE CALCULATIONS		
100 PSIG Steam Heat Balance	C-1	A-11
15 PSIG Steam Heat Balance	C-2	A-13
High Temperature Water Heat Balance	C-3	A-15
APPENDIX D.		
BOILER WATER CALCULATIONS		
Boiler Blowdown Calculations	D-I	A-17
Determining Feedwater Requirements	D-2	A-17
Determining Makeup Requirements	D-3	A-17
Determining Chemical Treatment Requirements	D-4	A-19

LIST OF TABLES

Table No.	Title	Page
1-1	Classification of Coals	1-7
1-2	Standard Specification for Fuel Oils	1-9
1-3	Fuel Oil Characteristics	1-10
1-4	Combustion Efficiency for Natural Gas	1-18
1-5	Combustion Efficiency for Number 2 Oil	I-19
1-6	Combustion Efficiency for Number 6 Oil	1-20
1-7	Combustion Efficiency for Coal, 3.5 Moisture, Bituminous	1-21
1-8	Combustion Efficiency for Coal, 9.0% Moisture, Bituminous	1-22
1-9	Water/ Steam Characteristics	1-25
1-10	Water/ Steam Mixtures	1-27
2-1	Typical Point Source Emission Levels for Various Pollutants	2-110
2-2	Comparison of NO _x Reduction Techniques	2-111
2-3	Performance Characteristics of Flue-Gas & sulfurization Systems	2-113
2-4	Performance Characteristics of Particulate Control Devices	2-114
2-5	Characteristics of Mechanical Dust Collectors	2-118
2-6	Removal Efficiencies of Uncontrolled Particulate Emissions from Combustion Process	2-120
2-7	Permissible Maximum Suction Lits and Minimum Suction Heads in Feet for Various Temperatures and Altitudes	2-128
2-8	Piping Codes and Standards for Boiler Plants	2-148
2-9	Typical Piping Material Applications	2-149
3-1	Flue Gas Analysis at 25%, 50%, and 100% Load for Natural Gas, No. 2 Oil, No. 6 Oil, and Stoker Coal	3-23
4-1	Common Cations and Anions	4-1
4-2	Water pH	4-5
4-3	Guide for Selection of External Treatment Equipment	4-11
4-4	Common Sodium Phosphates	4-30
4-5	Deaerator Temperature Versus Pressure	4-48
5-1	Lubricating Oils, Greases, and Preservatives	5-6
5-2	Lubricating Oil and Grease Uses	5-7

LIST OF FIGURES

Figure No.	Title	Page
1-1	100 psig Steam Heat Balance	1-2
1-2	15 psig Steam Heat Balance	1-3
1-3	High Temperature Water Heat Balance	1-4

Figure No.	Title	Page
2-98	Multicyclone Configuration	2-117
2-99	Cyclone Fractional Efficiency Curve	2-119
2-100	Reverse Flow Baghouse	2-121
2-101	Pulse Jet Baghouse	2-122
2-102	Weighted Wire Type Electrostatic Precipitator	2-124
2-103	Wet Approach Venturi Scrubber	2-126
2-104	Tube and Shell Heat Exchanger	2-127
2-105a	Maintain Proper Slope to Suction Line	2-129
2-105b	Suction Line Installation	2-129
2-106	Centrifugal Pump	2-130
2-107	Reciprocating Piston Pump	2-132
2-108	Two Methods of Providing Lost Motion	2-133
2-109a	Rotary Screw Pump	2-134
2-109b	Rotary Gear Pump	2-134
2-110	Steam Injector	2-136
2-111	Forced Draft Fan with Inlet Damper	2-138
2-112	Typical Outlet Fan Dampers	2-138
2-113	Fan Curves for Different Inlet Vane Positions	2-139
2-114	Fan Curve for Fan with Outlet Damper	2-139
2-115	Single-Stage Impulse Non-Condensing Turbine	2-141
2-116	Thermostatic Steam Trap	2-143
2-117	Float and Thermostatic Steam Trap	2-144
2-119	Disc/ Thermodynamic Steam Trap	2-146
2-119	Inverted Bucket Steam Trap	2-147
