

APPROVED FOR PUBLIC RELEASE; DISTRIBUTION IS UNLIMITED

Maintenance of Mechanical and Electrical Equipment at C4ISR Facilities

System Design Features

		<i>Paragraph</i>	<i>Page</i>
CHAPTER 1.	INTRODUCTION		
	Purpose	1-1	1-1
	Scope	1-2	1-1
	References	1-3	1-1
	Standard of performance	1-4	1-1
CHAPTER 2.	SYSTEMS ENGINEERING CONSIDERATIONS		
	General systems considerations	2-1	2-1
	Program elements	2-2	2-1
CHAPTER 3.	DIESEL ENGINES		
	Diesel engine ratings	3-1	3-1
	Types of diesel engines	3-2	3-1
	Diesel engine major system components	3-3	3-1
	Diesel engine system interfaces	3-4	3-2
	Operation of diesel engines	3-5	3-4
CHAPTER 4.	GAS TURBINES		
	Applications of gas turbines	4-1	4-1
	Gas turbine operating characteristics	4-2	4-1
	Gas turbine system major components	4-3	4-1
	Gas turbine system interfaces	4-4	4-4
CHAPTER 5.	FUEL OIL SYSTEMS		
	Simple fuel oil system	5-1	5-1
	Complex fuel oil system	5-2	5-1
	Fuel oil system major components	5-3	5-3
CHAPTER 6.	LUBE OIL SYSTEMS		
	Lube oil system design features	6-1	6-1
	Lube oil system major components	6-2	6-9
CHAPTER 7.	ENGINE INTAKE AND EXHAUST SYSTEMS		
	Engine intake and exhaust system design features	7-1	7-1
	Engine intake and exhaust system major components	7-2	7-4

		<i>Paragraph</i>	<i>Page</i>
CHAPTER 8.	COOLING SYSTEMS		
	Cooling system design features	8-1	8-1
	Cooling system major components	8-2	8-9
CHAPTER 9.	BOILERS		
	Types of boilers	9-1	9-1
	Types of systems	9-2	9-1
	Boiler system major components	9-3	9-2
	Boiler system controls	9-4	9-3
CHAPTER 10.	INCINERATORS		
	Incineration system description	10-1	10-1
	Incineration system major components	10-2	10-1
CHAPTER 11.	CHILLED WATER SYSTEMS		
	Chilled water systems description	11-1	11-1
	Chilled water systems major components	11-2	11-1
CHAPTER 12.	DOMESTIC WATER SYSTEMS		
	Domestic water system description	12-1	12-1
	Domestic water system major components	12-2	12-1
CHAPTER 13.	CHEMICAL TREATMENT		
	Chemical treatment system design features	13-1	13-1
	Chemical treatment system major components	13-2	13-6
CHAPTER 14.	AIR HANDLING SYSTEMS		
	Air handling system design features	14-1	14-1
	Air handling system major components	14-2	14-6
CHAPTER 15.	INDUSTRIAL WATER SUPPLY SYSTEMS		
	Industrial water supply system design features	15-1	15-1
	Industrial water supply system major components	15-2	15-2
	Testing	15-3	15-3
CHAPTER 16.	COMPRESSED AIR SYSTEMS		
	Compressed air system	16-1	16-1
	Compressed air system major components	16-2	16-1
	Compressed air system interfaces	16-3	16-8
CHAPTER 17.	PNEUMATIC CONTROLS		
	Pneumatic control design features	17-1	17-1
	Pneumatic control systems major components	17-2	17-1
	System operation	17-3	17-3
CHAPTER 18.	SANITARY WASTE SYSTEMS		
	General sanitary waste systems	18-1	18-1
	Sanitary waste system design features	18-2	18-1
	Sanitary waste system applications	18-3	18-1
	Treatment methods	18-4	18-2

	<i>Paragraph</i>	<i>Page</i>
Typical sanitary waste systems	18-5	18-3
Sludge handling, treatment, and disposal	18-6	18-7
Disinfection	18-7	18-7
Flow measurement, sampling, and process control	18-8	18-8
 CHAPTER 19. GENERATORS		
Generator usage	19-1	19-1
Generator operation	19-2	19-1
Generator types	19-3	19-2
AC generators	19-4	19-2
DC generators	19-5	19-5
Major design components	19-6	19-6
 CHAPTER 20. PRIMARY ELECTRICAL DISTRIBUTION		
General primary electrical distribution	20-1	20-1
Substations	20-2	20-1
Overhead distribution	20-3	20-4
Switchgear	20-4	20-5
Circuit breakers	20-5	20-6
 CHAPTER 21. SECONDARY ELECTRICAL DISTRIBUTION		
General secondary electrical distribution	21-1	21-1
Switchgear, switchboards, and panelboards	21-2	21-1
Transformers	21-3	21-1
Power line conditioners	21-4	21-1
Motor control centers	21-5	21-3
Protective devices, fuses, and circuit breakers	21-6	21-3
Switches	21-7	21-4
Feeder cables	21-8	21-5
Controls	21-9	21-5
 CHAPTER 22. STATIC UNINTERRUPTIBLE POWER SUPPLY		
General	22-1	22-1
Battery and battery charger	22-2	22-1
Inverter	22-3	22-3
Transfer switches	22-4	22-4
Instrumentation	22-5	22-5
Operational considerations	22-6	22-5
 CHAPTER 23. ROTARY UNINTERRUPTIBLE POWER SUPPLY		
General rotary uninterruptible power supply	23-1	23-1
Rotary UPS design features	23-2	23-1
 CHAPTER 24. MOTOR GENERATORS		
General motor generators	24-1	24-1
Motor generator design features	24-2	24-1

		<i>Paragraph</i>	<i>Page</i>
CHAPTER 25.	ELECTRICAL CONTROLS		
	Generalelectrical controls	25-1	25-1
	Major components of an electrical control system	25-2	25-1
CHAPTER 26.	ELECTRONIC SECURITY		
	Electronic security methodology	26-1	26-1
	Types of electronic security	26-2	26-1
CHAPTER 27.	HEMP PROTECTION SYSTEMS		
	General HEMP protection systems	27-1	27-1
	HEMP procedures	27-2	27-1
	Modes of HEMP entry	27-3	27-2
	Equipment susceptibility	27-4	27-2
	HEMP protection systems	27-5	27-3
CHAPTER 28.	TEMPEST PROTECTION SYSTEMS		
	GeneralTEMPEST protection systems	28-1	28-1
	Sources	28-2	28-1
	Acquisition	28-3	28-1
	Protection	28-4	28-1
CHAPTER 29.	GROUNDING		
	Generalgrounding systems	29-1	29-1
	Types of grounding	29-2	29-1
	Grounding systems	29-3	29-3
	Ground system materials and testing requirements	29-4	29-4
CHAPTER 30.	LIGHTNING PROTECTION		
	General lightning protection systems	30-1	30-1
	Lightning effects on power systems	30-2	30-1
	Principles of protection	30-3	30-2
	Lightning protection systems equipment requirements	30-4	30-3
CHAPTER 31.	CATHODIC PROTECTION		
	Generalcathodic protection systems	31-1	31-1
	Types of cathodic protection systems	31-2	31-1
	Application of cathodic protection	31-3	31-2
	Cathodic protection system design	31-4	31-3
CHAPTER 32.	BLAST PROTECTION AND DETECTION SYSTEM		
	Generalblast protection and detection systems	32-1	32-1
	Sensors	32-2	32-1
	Relay panels	32-3	32-1
	Blast valve systems	32-4	32-1
	Blast door systems	32-5	32-1
CHAPTER 33.	FIRE PROTECTION		
	General fire protection systems	33-1	33-1
	Fire detection systems	33-2	33-1
	Fire suppression systems	33-3	33-2

APPENDIX A. REFERENCES		A-1
GLOSSARY		G-1

LIST OF FIGURES

<i>Figure</i>	<i>Title</i>	<i>Page</i>
Figure 5-1	Complex fuel oil system - supply	5-2
Figure 6-1	General lube oil system – diesel engine	6-2
Figure 6-2	General lube oil storage and dispensing system	6-3
Figure 6-3	Lube oil purification system	6-4
Figure 6-4	Emergency service diesel engine lube oil system	6-6
Figure 6-5	Primary service diesel engine lube oil system	6-7
Figure 6-6	Diesel engine standby operation lube oil heating system	6-8
Figure 7-1	Blast-protected air intake system	7-3
Figure 7-2	Blast-protected engine exhaust system	7-5
Figure 7-3	Blast-protected exhaust system	7-6
Figure 8-1	Examples of engine cooling systems (1)	8-2
Figure 8-2	Examples of engine cooling systems (2)	8-3
Figure 8-3	Examples of engine cooling systems (3)	8-4
Figure 8-4	Typical primary service diesel engine cooling system	8-6
Figure 8-5	Typical radiator diesel engine cooling system	8-8
Figure 8-6	Typical evaporative cooling tower	8-10
Figure 10-1	Vertical dual chamber incinerator	10-2
Figure 11-1	Variations of centrifugal pumps	11-5
Figure 11-2	Typical valves used in water service (1)	11-8
Figure 11-3	Typical valves used in water service (2)	11-9
Figure 12-1	Domestic water system with reservoir storage	12-2
Figure 12-2	Bladder tank installation	12-4
Figure 12-3	Electric water heater	12-5
Figure 12-4	Instantaneous steam water heater	12-6
Figure 12-5	Semi-instantaneous steam water heater	12-7
Figure 12-6	Backflow preventors	12-8
Figure 13-1	Typical fill system pot feeder installation	13-3
Figure 13-2	Typical pot feeder bypass installation	13-4
Figure 13-3	Open-loop chemical treatment system	13-5
Figure 13-4	Typical steam boiler installation	13-6
Figure 13-5	Basic water softener system	13-7
Figure 13-6	Basic ion exchange unit	13-8
Figure 14-1	Typical single zone air handling system	14-2

<i>Figure</i>	<i>Title</i>	<i>Page</i>
Figure 14-2	Multizone air handling system	14-3
Figure 14-3	Basic dual duct act handling system	14-4
Figure 14-4	Air handling system with reheat	14-5
Figure 14-5	Variable air volume air handling system	14-7
Figure 14-6	Typical air handling system controls	14-15
Figure 16-1	Typical air compressor systems	16-2
Figure 16-2	Typical air dryers	16-3
Figure 16-3	Typical air compressor installation	16-4
Figure 16-4	Typical engine compressed air starting system	16-5
Figure 17-1	Basic compressed air supply to pneumatic control system	17-2
Figure 18-1	Typical trickling filter process treatment train	18-4
Figure 18-2	Conventional plug flow activated sludge flow diagram	18-5
Figure 18-3	Septic tank	18-8
Figure 18-4	Lift station with wet pit vertical centrifugal pump	18-9
Figure 18-5	Pneumatic sewage ejector	18-10
Figure 18-6	Gate valve and swing check valve	18-11

LIST OF TABLES

<i>Table</i>	<i>Title</i>	<i>Page</i>
Table 3-1	Typical alarm and shutdown requirements for diesel engines	3-3
Table 4-1	Typical alarm and shutdown requirements for gas turbines	4-3
Table 7-1	Typical bellows material failures	7-8
