

APPROVED FOR PUBLIC RELEASE; DISTRIBUTION IS UNLIMITED

**COMMISSIONING OF ELECTRICAL SYSTEMS FOR COMMAND,
CONTROL, COMMUNICATIONS, COMPUTER, INTELLIGENCE,
SURVEILLANCE, AND RECONNAISSANCE (C4ISR) FACILITIES**

	<i>Paragraph</i>	<i>Page</i>
CHAPTER 1	INTRODUCTION	
	Purpose	1-1
	Scope	1-2
	Reference	1-3
	General system testing requirements	1-4
	Component testing	1-5
	System commissioning testing	1-6
	Cost of commissioning	1-7
CHAPTER 2	GENERAL SYSTEM TESTING REQUIREMENTS	
	Introduction	2-1
	General test plan	2-2
	Types of testing methods	2-3
	Insulation testing	2-4
	Switch/circuit breaker testing	2-5
	Transformer testing	2-6
	Rotating machine testing	2-7
	Protective relays	2-8
	Ground system testing	2-9
CHAPTER 3	COMPONENT TESTING	
	Introduction to component testing	3-1
	Circuit switchers	3-2
	Transformers	3-3
	Switchgear – medium voltage	3-4
	Switchgear – low voltage	3-5
	Transfer switch	3-6
	AC/DC drives	3-7
	Motors	3-8
	Generators	3-9
	Batteries	3-10
	Battery chargers	3-11
	UPS systems	3-12
	Cables	3-13

	<i>Paragraph</i>	<i>Page</i>
CHAPTER 4	MAIN POWER SYSTEM	
	Description of main power system	4-1
	Operation of main power system	4-2
	Commissioning plan for main power system	4-3
	Installation inspections and component testing of main power system	4-4
	Energizing and test of the main power system	4-5
	Possible failures and corrective actions of the main power system	4-6
CHAPTER 5	STANDBY POWER SYSTEM	
	Description of standby power system	5-1
	Operation of standby power system	5-2
	Commissioning plan for standby power system	5-3
	Installation inspections and component testing of standby power system	5-4
	Energizing and test of the standby power system	5-5
	Possible failures and corrective actions of the standby power system:	5-6
CHAPTER 6	UNINTERRUPTIBLE POWER SUPPLY SYSTEMS	
	Description of uninterruptible power supply (UPS) system	6-1
	Operation of uninterruptible power supply system	6-2
	Commissioning plan for the UPS system	6-3
	Installation inspections and component testing of the UPS system	6-4
	Energizing and test of the UPS system	6-5
	Possible failures and corrective actions	6-6
APPENDIX A	REFERENCES	A-1

LIST OF TABLES

<i>Table</i>	<i>Title</i>	<i>Page</i>
1-1	Costs of commissioning, new construction	1-3
2-1	Recommended minimum insulation resistance values at 40°C (all values in MΩ)	2-10
2-2	Recommended minimum values of polarization index for all machine components insulation classes	2-16
3-1	Medium-voltage cables maximum field acceptance test voltages (kV, dc)	3-10
4-1	Circuit switcher functional checklist	4-3
4-2	Possible failures and corrective actions of the main power system	4-5
5-1	Possible failures and corrective actions of the standby power system	5-4
6-1	Possible failures and corrective actions of the UPS system	6-6

LIST OF FIGURES

<i>Figure</i>	<i>Title</i>	<i>Page</i>
Figure 2-1	Sample of a commissioning plan	2-8
Figure 2-2	Step-voltage vs. time	2-12
Figure 2-3	Step-voltage high-potential test current	2-12
Figure 2-4	Power transformer diagram (Reprinted from Department of the Army TM 5-686. Power Transformer Maintenance and Acceptance Testing 16 November 1998)	2-15
Figure 3-1	Static UPS system 150 to 750 kVA (courtesy of Liebert).	3-9
Figure 4-1	Main power system single line diagram	4-7
Figure 4-2	Main power system control cable block diagram	4-8
Figure 4-3	Main power system functional diagram – circuit switcher (typical for 2)	4-9
Figure 4-4	Main power system functional diagram – switchgear load breaker (typical for 8)	4-10
Figure 4-5	Main power system functional diagram – switchgear incoming breaker (typical for 3)	4-11
Figure 4-6	Main power system circuit switcher wiring diagram (typical for 2)	4-12
Figure 4-7	Main power system incoming breaker wiring diagram	4-13
Figure 4-8	Sample of completed DA Form 7463-R	4-14
Figure 4-9	Sample of completed DA Form 7464-R	4-15
Figure 4-10	Sample of completed DA Form 7465-R	4-16
Figure 4-11	Sample of completed DA Form 7466-R	4-17
Figure 4-12	Sample of completed DA Form 7467-R	4-18
Figure 5-1	Standby power system single line diagram	5-6
Figure 5-2	Standby power system block diagram	5-7
Figure 5-3	Standby power system wiring diagram	5-8
Figure 5-4	Engine fault tree	5-9
Figure 5-5	Sample of completed DA Form 7468-R	5-10
Figure 5-6	Sample of completed DA Form 7469-R	5-12
Figure 5-7	Sample of completed DA Form 7470-R	5-13
Figure 6-1	Uninterruptible power supply system single line diagram	6-9
Figure 6-2	Uninterruptible power supply system block diagram	6-10
Figure 6-3	Uninterruptible power supply system wiring diagram	6-11
Figure 6-4	Sample of completed DA Form 7471-R	6-12
Figure 6-5	Sample of completed DA Form 7472-R	6-13
Figure 6-6	Sample of completed DA Form 7473-R	6-14
Figure 6-7	Sample of completed DA Form 7474-R	6-15
