

**APPROVED FOR PUBLIC RELEASE: DISTRIBUTION IS UNLIMITED**

**RELIABILITY/AVAILABILITY OF ELECTRICAL & MECHANICAL  
SYSTEMS FOR COMMAND, CONTROL, COMMUNICATIONS,  
COMPUTER, INTELLIGENCE, SURVEILLANCE, AND  
RECONNAISSANCE (C4ISR) FACILITIES**

**CONTENTS**

	Paragraph	Page
<b>CHAPTER 1. INTRODUCTION</b>		
Purpose.....	1-1	1-1
Scope.....	1-2	1-1
References.....	1-3	1-1
Definitions.....	1-4	1-1
Historical perspective.....	1-5	1-2
Relationship among reliability, maintainability, and availability .....	1-6	1-2
The importance of availability and reliability to C4ISR facilities .....	1-7	1-3
Improving availability of C4ISR facilities .....	1-8	1-4
<b>CHAPTER 2. BASIC RELIABILITY AND AVAILABILITY CONCEPTS</b>		
Probability and statistics .....	2-1	2-1
Calculating reliability.....	2-2	2-4
Availability .....	2-3	2-6
Predictions and assessments.....	2-4	2-8
<b>CHAPTER 3. IMPROVING AVAILABILITY OF C4ISR FACILITIES</b>		
Overview of the process.....	3-1	3-1
New facilities in design.....	3-2	3-1
Facilities already in use.....	3-3	3-4
Improving availability through addition of redundancy .....	3-4	3-5
Improving availability through reliability-centered maintenance (RCM) .	3-5	3-13
Application of RCM to C4ISR facilities.....	3-6	3-14
<b>CHAPTER 4. ASSESSING RELIABILITY AND AVAILABILITY OF C4ISR FACILITIES</b>		
Purpose of the assessment.....	4-1	4-1
Approach.....	4-2	4-1
General modeling concepts .....	4-3	4-1
Prediction .....	4-4	4-2
The GO method.....	4-5	4-3
GO model development .....	4-6	4-14
<b>APPENDIX A REFERENCES.....</b>		<b>A-1</b>

CONTENTS		<i>Paragraph</i>	<i>Page</i>
APPENDIX B THE MATHEMATICS OF RELIABILITY			
Introduction to the mathematics of reliability .....	B-1	B-1	
Uncertainty – at the heart of probability .....	B-2	B-1	
Probability and reliability .....	B-3	B-2	
Failure rate data.....	B-4	B-3	
Calculating reliability.....	B-5	B-4	
Calculating basic versus functional reliability .....	B-6	B-5	
APPENDIX C POINT ESTIMATES AND CONFIDENCE BOUNDS			
Introduction to point estimates and confidence bounds.....	C-1	C-1	
APPENDIX D FACTORS INFLUENCING FIELD MEASURES OF RELIABILITY			
Design reliability versus field reliability.....	D-1	D-1	
Accounting for the difference .....	D-2	D-1	
APPENDIX E REDUNDANCY AS A DESIGN TECHNIQUE			
Introduction to redundancy as a design technique .....	E-1	E-1	
GLOSSARY .....		G-1	

**LIST OF TABLES**

<i>Number</i>	<i>Title</i>	<i>Page</i>
1-1	Factors in selecting tasks for a specific program .....	1-6
1-2	Typical reliability-related measures .....	1-6
2-1	Commonly used continuous distribution .....	2-3
2-2	Effect of measurement interval on observed availability.....	2-8
2-3	Methods for assessing reliability.....	2-10
3-1	The process for improving facility availability .....	3-1
3-2	Analysis helpful in designing for reliability.....	3-3
3-3	Diagnostic implications of fault tolerant design approaches .....	3-7
3-4	Questions for the reliability design engineer related to fault tolerance.....	3-9
3-5	Calculated availability of system in figure 3-3 using RAPTOR.....	3-10
3-6	Relative unreliability of subsystems (repairs ignored).....	3-10
4-1	Steps in performing a simulation .....	4-2
4-2	Equipment reliability data for Gold Book Standard Network configuration	4-16
4-3	GO1 model file.....	4-20
4-4	GO2 parts list file.....	4-22
4-5	GO3 results file .....	4-22
4-6	GO results output file.....	4-24
4-7	Accurately entering GO1 and GO2 files .....	4-25
4-8	Analysis error messages.....	4-25
4-9	Error messages .....	4-26

**CONTENTS**

**LIST OF FIGURES**

<i>Number</i>	<i>Title</i>	<i>Page</i>
1-1	A sound reliability strategy addresses all phases of a system's life cycle ..	1-5
2-1	Typical normal distribution curve.....	2-2
2-2	Exponential curve relating reliability and time.....	2-4
2-3	Example reliability block diagram.....	2-5
2-4	RBD of a system with redundant components.....	2-5
2-5	Different combinations of MTBF and MTTR yield the same availability.	2-7
3-1	Types of redundancy.....	3-6
3-2	Effect of maintenance concept on level of fault tolerance.....	3-9
3-3	Analyzing the contributions to system availability helps determine where redundancy is needed.....	3-10
4-1	Single line diagram of IEEE Gold Book Standard Network.....	4-15
4-2	Boolean algebra diagram of the IEEE Gold Book Standard Network.....	4-17
4-3	Utility 1 path to main bus A.....	4-18
4-4	Paths to generator bus.....	4-19
4-5	MS-DOS screen while performing analysis.....	4-23
