

**HAZARDOUS WASTE LAND DISPOSAL/
 LAND TREATMENT FACILITIES**

	Paragraph	Page
Chapter 1. INTRODUCTION		
Purpose	1-1	1-1
Scope	1-2	1-1
2. REGULATORY FRAMEWORK		
Federal regulations	2-1	2-1
State and local regulatory requirements	2-2	2-1
Army regulations	2-3	2-2
3. PRE-DESIGN EVALUATION OF SITE CONDITIONS		
Environmental and sociopolitical conditions	3-1	3-1
Review of relevant site data	3-2	3-1
Hydrogeologic conditions	3-3	3-2
Climate elements	3-4	3-4
Impact of site conditions on selection of disposal method	3-5	3-4
Design requirements imposed by hydrogeologic conditions	3-6	3-5
4. DISPOSAL AND HANDLING CONSTRAINTS IMPOSED BY WASTE COMPOSITION		
Impact of waste stream on selection of disposal type	4-1	4-1
Design and handling constraints imposed by waste composition	4-2	4-1
Waste analysis plan	4-3	4-1
5. LAND DISPOSAL/LAND TREATMENT OPTIONS		
Introduction	5-1	5-1
Landfills	5-2	5-3
Surface impoundments	5-3	5-4
Land treatment	5-4	5-7
Deep well injection	5-5	5-12
Waste piles	5-6	5-13
6. HAZARDOUS WASTE FACILITY DESIGN ELEMENTS		
Introduction	6-1	6-1
Flood control systems	6-2	6-1
Liner systems	6-3	6-1
Leak detection and leachate collection and removal systems	6-4	6-11
Surface water run-on and run-off control systems	6-5	6-14
Gas control systems	6-6	6-21
Final cover	6-7	6-22
Special design elements	6-8	6-25
7. OPERATIONS AND CONTINGENCY PLANS/TRAINING		
Operations	7-1	7-1
Permit application assistance	7-2	7-2
Contingency plans	7-3	7-2
Personnel requirements, training, and safety	7-4	7-2
8. GROUND-WATER MONITORING		
Introduction	8-1	8-1
Monitoring requirements	8-2	8-1
Monitoring program	8-3	8-1
9. CLOSURE AND POST-CLOSURE PLANS		
Introduction	9-1	9-1
Closure procedures	9-2	9-1
Components of closure plan	9-3	9-1
Post-closure plans	9-4	9-2
10. COST ANALYSIS		
Cost elements	10-1	10-1
Unit costs	10-2	10-1
Appendix A REFERENCES		A-1
B FEDERAL AND STATE HAZARDOUS WASTE REGULATIONS.....		B-1
C EXAMPLE DESIGN PROBLEM.....		C-1
BIBLIOGRAPHY		BIBLIO-1

LIST OF FIGURES

		Page
Figure	5-1 Illustrative hazardous waste master plan	5-2
	5-2 Landfill operations plan	5-5
	5-3 Land treatment area details	5-9
	5-4 Land treatment operations plan	5-11
	5-5 Deep injection well	5-14
	6-1 Flood control structures	6-2
	6-2 Base liner details for landfills and surface impoundments	6-5
	6-3 Base liner details for waste piles	6-6
	6-4 Typical clay liner compatibility evaluation	6-10
	6-5 Typical leak detection systems and leachate collection drains	6-13
	6-6 Typical run on control ditches	6-16
	6-7 Typical run-on control ditch for waste units	6-17
	6-8 Typical run-off control ditch for final cover areas	6-18
	6-9 Run-on sedimentation control run-off retention basins	6-20
	6-10 Final cover details	6-23
	8-1 Monitoring well details	8-3
	8-2 Monitoring well installations	8-4

LIST OF TABLES

Table	3-1 Composition and quantity data resources	3-2
	3-2 Design/operational requirements imposed by hydrogeologic conditions	3-6
	5-1 Design features required by RCRA for DA land disposal and treatment facilities	5-1
	6-1 Requirements for liner systems	6-3
	6-2 Summary of liner types	6-7
	6-3 Seaming provisions for synthetic liners	6-11
	6-4 Requirements for leachate collection and removal systems	6-12
	6-5 Requirements for surface water run on and run-off control systems	6-15
	6-6 Requirements for final cover at closure	6-22
	6-7 Requirements for special design elements	6-26
	10-1 Summary of unit costs for lined facility	10-1
