LIST OF FIGURES

- Figure 3-1. Cross section of general types of medians.
 3-2. Design policy for guardrails, guideposts, and earth slopes.
 3-3. Method of layout of widening and superelevation of spiral lanes.
 3-4. Stopping sight distance on horizontal curves and open road conditions.
 3-5. Types of vertical curves.
 3-6. Typical road-type cross sections.
 3-7. Typical street-type cross sections.

LIST OF TABLES

- Table 1-1. Geometric design policies for classified roads within "open" areas of military installation.
 1-2. Geometric design policies for classified streets within "built-up" areas of military installation.
 3-1. Design vehicle dimensions.
 3-2. Rigid pavement design index.
 3-3. Calculated and design values for pavement widening on roads and streets within military installations two-lane pavements, one-way or two-way.
 3-4. Width of walks.
