

TECHNICAL MANUAL  
No. 5-822-5  
AIR FORCE MANUAL  
No. 88-7, CHAPTER 1

\*TM 5-822-5  
\*AFM 88-7, Chap. 1  
HEADQUARTERS  
DEPARTMENT OF THE ARMY  
AND THE AIR FORCE  
WASHINGTON, DC, 12 June 1992

## PAVEMENT DESIGN FOR ROADS, STREET, WALKS, AND OPEN STORAGE AREAS

	Paragraph	Page
<b>CHAPTER 1. INTRODUCTION</b>		
Purpose .....	1-1	1-1
Scope .....	1-2	1-1
References .....	1-3	1-1
Selection of Pavement Type .....	1-4	1-1
Basis of Design .....	1-5	1-1
Computer Aided Design .....	1-6	1-1
<b>CHAPTER 2. PRELIMINARY INVESTIGATIONS</b>		
General .....	2-1	2-1
Investigations of Site .....	2-2	2-1
Soil Conditions .....	2-3	2-1
Borrow Areas .....	2-4	2-1
<b>CHAPTER 3. VEHICULAR TRAFFIC</b>		
Effect on Pavement Design .....	3-1	3-1
Traffic Evaluation .....	3-2	3-1
<b>CHAPTER 4. FLEXIBLE PAVEMENT SUBGRADES</b>		
Factors To Be Considered .....	4-1	4-1
Compaction .....	4-2	4-1
Compaction Example .....	4-3	4-1
Selection of Design CBR Values .....	4-4	4-2
<b>CHAPTER 5. FLEXIBLE PAVEMENT SELECT MATERIALS AND SUBBASE COURSES</b>		
General .....	5-1	5-1
Materials .....	5-2	5-1
Compaction .....	5-3	5-4
Drainage .....	5-4	5-2
Selection of Design CBR Values .....	5-5	5-2
<b>CHAPTER 6. FLEXIBLE PAVEMENT BASE COURSES</b>		
Materials .....	6-1	6-1
Compaction .....	6-2	6-1
Drainage .....	6-3	6-1
Selection of Design CBR .....	6-4	6-1
Minimum Thickness .....	6-5	6-1
<b>CHAPTER 7. BITUMINOUS PAVEMENT</b>		
General .....	7-1	7-1
Criteria for Bituminous Pavements .....	7-2	7-1
<b>CHAPTER 8. FLEXIBLE PAVEMENT DESIGN</b>		
General .....	8-1	8-1
Design Procedure .....	8-2	8-1
Design Index .....	8-3	8-1
Thickness Criteria-Conventional Flexible Pavements .....	8-4	8-1
Example Thickness Design-Conventional Flexible Pavements .....	8-5	8-2
Thickness Criteria-Stabilized Soil Layers .....	8-6	8-3
Example Thickness Design-Stabilized Soil Layers .....	8-7	8-4
Shoulders and Similar Areas .....	8-8	8-4
Bituminous Sidewalks .....	8-9	8-5
Bituminous Driveways .....	8-10	8-5

This publication with special software (Appendix E) has a value of less than \$100.00 per copy, and does not require accountability under the provisions of AR 735-17 and AR 710-2-1.

**APPROVED FOR PUBLIC RELEASE; DISTRIBUTION IS UNLIMITED**

---

\*This manual supersedes TM 5-822-5/AFM 88-7, Chap 3, dated 1 October 1980 and TM 5-822-6/AFM 88-7, Chap 1, dated 1 April 1977.

	<i>Paragraph</i>	<i>Page</i>
Curbs and Gutters .....	8-11	8-6
Flexible Overlay Design .....	8-12	8-6
<b>CHAPTER 9. RIGID PAVEMENT SUBGRADES</b>		
Soil Classification and Tests .....	9-1	9-1
Compaction .....	9-2	9-1
Treatment of Unsuitable Soils .....	9-3	9-1
Determination of Modulus of Subgrade Reaction .....	9-4	9-2
<b>CHAPTER 10. RIGID PAVEMENT BASE COURSES</b>		
General Requirements .....	10-1	10-1
Materials .....	10-2	10-1
Compaction .....	10-3	10-1
Frost Requirements .....	10-4	104
<b>CHAPTER 11. CONCRETE PAVEMENT</b>		
Mix Proportioning and Control .....	11-1	11-1
Testing .....	11-2	11-1
Special Conditions .....	11-3	11-1
<b>CHAPTER 12. PLAIN CONCRETE PAVEMENT DESIGN</b>		
General .....	12-1	12-1
Roller-Compacted Concrete Pavements .....	12-2	12-1
Design Procedure .....	12-3	12-1
Design Procedure for Stabilized Foundations .....	12-4	12-3
Design Examples .....	12-5	12-4
Concrete Sidewalks .....	12-6	12-4
Concrete Driveways .....	12-7	12-5
Curbs, Gutters, and Shoulders .....	12-8	12-5
<b>CHAPTER 13. REINFORCED CONCRETE PAVEMENTS</b>		
Application .....	13-1	13-1
Design Procedure .....	13-2	13-3
Limitations .....	13-3	13-5
Reinforcing Steel .....	13-4	13-5
Design Examples .....	13-5	13-5
Design Details .....	13-6	13-6
<b>CHAPTER 14. PAVEMENT OVERLAYS</b>		
General .....	14-1	14-1
Definitions and Symbols for Overlay Pavement Design .....	14-2	14-1
Preparation of Existing Pavement .....	14-3	14-1
Condition of Existing Rigid Pavement .....	14-4	14-2
Rigid Overlay of Existing Rigid Pavement .....	14-5	14-2
Rigid Overlay of Existing Flexible or Composite Pavements .....	14-6	14-4
Flexible Overlay of Flexible Pavements .....	14-7	14-4
Flexible Overlay of Rigid Base Pavement .....	14-8	14-4
Use of Geotextiles to Retard Reflective Cracking .....	14-9	14-7
Overlays in Frost Regions .....	14-10	14-8
Overlay Design Example .....	14-11	14-8
<b>CHAPTER 15. JOINTS FOR PLAIN CONCRETE</b>		
Design Details .....	15-1	15-1
Joint Types and Usage .....	15-2	15-1
Dowels .....	15-3	15-17
Special Provisions for Slipform Paving .....	15-4	15-17
Joint Sealing .....	15-5	15-17
Special Joints and Junctures .....	15-6	15-17
<b>CHAPTER 16. JOINTS FOR REINFORCED CONCRETE</b>		
Requirements .....	16-1	16-1
Joint Sealing .....	16-2	16-8
<b>CHAPTER 17. ROLLER-COMPACTED CONCRETE PAVEMENTS</b>		
Introduction .....	17-1	17-1
Load Transfer .....	17-2	17-1
Thickness Design .....	17-3	17-1
Multilift Pavements .....	17-4	17-1
Joint Types for RCC .....	17-5	17-2
<b>CHAPTER 18. SEASONAL FROST CONDITIONS</b>		
General .....	18-1	18-1
Definitions .....	18-2	18-2
Frost-Susceptibility Classification .....	18-3	18-4

	<i>Paragraph</i>	<i>Page</i>
Alternative Methods of Thickness Design .....	18-4	18-6
Selection of Design Method .....	18-5	18-6
Limited Subgrade Frost Penetration .....	18-6	18-6
Reduced Subgrade Strength .....	18-7	18-12
Use of State Highway Requirements .....	18-8	18-14
Free-Draining Material Directly Beneath Bound Base or Surfacing Layer .....	18-9	18-14
Other Granular Unbound Base Course .....	18-10	18-15
Use of F1 and F2 Soils for Base Materials .....	18-11	18-15
Filter or Drainage Requirements .....	18-12	18-15
Stabilizers and Stabilized Layers .....	18-13	18-15
Stabilization with Lime and with LCF .....	18-14	18-16
Stabilization with Portland Cement .....	18-15	18-16
Stabilization with Bitumen .....	18-16	18-16
Subgrade Requirements .....	18-17	18-16
Other Measures to Reduce Heave .....	18-18	18-18
Pavement Cracking Associated with Frost Heave .....	18-19	18-18
Control of Subgrade and Base Course Construction .....	18-20	18-18
Base Course Construction .....	18-21	18-19
Compaction .....	18-22	18-19
Use of Insulation Materials in Pavements .....	18-23	18-19
Design Example-Heavily Trafficked Road .....	18-24	18-19
<b>APPENDIX A. REFERENCES .....</b>		<b>A-1</b>
<b>APPENDIX B. DETERMINATION OF FLEXURAL STRENGTH AND MODULUS OF ELASTICITY OF BITUMINOUS CONCRETE .....</b>		<b>B-1</b>
<b>APPENDIX C. METHOD OF TEST FOR PERFORMED POLYCHLOROPRENE ELASTOMERIC JOINT SEAL JET-FUEL-RESISTANCE .....</b>		<b>C-1</b>
<b>APPENDIX D. USE OF INSULATION MATERIALS IN PAVEMENTS .....</b>		<b>D-1</b>
<b>APPENDIX E. COMPUTER AIDED DESIGN FOR FLEXIBLE ROAD PAVEMENTS/RIGID ROAD PAVEMENTS .....</b>		<b>E-1</b>

## List of Figures

<i>Figure No.</i>	<i>Title</i>	<i>Page</i>
8-1.	Flexible Pavement Design Curve for Roads and Streets .....	8-2
8-2.	Equivalency Factors for Soils Stabilized with Cement, Lime or Cement and Lime Mixed with Flyash .....	8-4
9-1.	Effect of Base-Course Thickness on Modulus of Soil Reaction .....	9-3
12-1.	Design Curves for Plain Concrete Roads and Streets, and RCCP .....	12-2
12-2.	Design Curve for Plain Concrete Parking and Open Storage Areas .....	12-3
13-1.	Typical Layout of Joints at Intersection .....	13-2
13-2.	Reinforced Rigid Pavement Design .....	13-4
13-3.	Design Details of Reinforced Rigid Pavement with Two Traffic Lanes .....	13-6
13-4.	Design Details of Reinforced Rigid Pavement with Traffic and Parking Lanes .....	13-8
13-5.	Design Details of Reinforced Rigid Pavement with Integral Curb .....	13-9
13-6.	Typical Layout of Joints at the Intersection of Reinforced Rigid Pavement .....	13-11
14-1.	Factor for Projecting Cracking in a Flexible Pavement .....	14-6
14-2.	Location Guide for the Use of Geotextiles in Retarding Reflective Cracking .....	14-6
15-1.	Design Details for Plain Concrete Pavements .....	15-2
15-2.	Joint Layout for Vehicular Parking Areas .....	15-4
15-3.	Contraction Joints for Plain Concrete Pavements .....	15-5
15-4.	Construction Joints for Plain Concrete Pavements .....	15-6
15-5.	Expansion Joints for Plain Concrete Pavements .....	15-10
15-6.	Thickened-Edge Slip Joint .....	15-11
15-7.	Joint Sealant Details .....	15-12
16-1.	Contraction Joints for Reinforced Concrete Pavements .....	16-2
16-2.	Construction Joints for Reinforced Concrete Pavements .....	16-3
16-3.	Expansion Joints for Reinforced Concrete Pavements .....	16-7
18-1.	Determination of Freezing Index .....	18-4
18-2.	Distribution of Design Freezing Index for North America .....	18-8
18-3.	Frost Penetration Beneath Pavements .....	18-9
18-4.	Design Depth of Nonfrost-Susceptible Base for Limited Subgrade Frost Penetration .....	18-12
18-5.	Frost-Area Index of Reaction for Design of Rigid Roads, Streets, and Open Storage Areas .....	18-14
18-6.	Tapered Transition Used Where Embankment Material Differs from Natural Subgrade in Cut .....	18-18
D-1.	Equivalent Sinusoidal Surface Temperature Amplitude A and Initial Temperature Difference $V_0$ .....	D-2
D-2.	Thickness of Extruded Polystyrene Insulation to Prevent Subgrade Freezing .....	D-3
D-3.	Effect of Thickness of Insulation and Base on Frost Penetration .....	D-4

**List of Tables**

<i>Table No.</i>	<i>Title</i>	<i>Page</i>
3-1.	Pavement Design Index .....	3-2
4-1.	Depth of Compaction for Select Materials and Subgrades (CBR $\leq$ 20) .....	4-1
5-1.	Maximum Permissible Design Values for Subbases and Select Materials .....	5-1
6-1.	Minimum Thickness of Pavement and Base Course .....	6-2
8-1.	Equivalency Factors for Bituminous Stabilized Materials .....	8-3
9-1.	Modulus of Soil Reaction .....	9-2
15-1.	Maximum Allowable Spacing of Transverse Contraction Joints .....	15-15
15-2.	Dowel Size and Spacing for Construction, Contraction, and Expansion Joints .....	15-15
18-1.	Modes of Distress in Pavements .....	18-2
18-2.	Frost Design Soil Classification .....	18-5
18-3.	Frost-Area Soil Support Indexes for Subgrade Soils for Flexible Pavement Design .....	18-13
