

**PROCEDURES FOR US ARMY AND US AIR FORCE AIRFIELD
 PAVEMENT CONDITION SURVEYS**

	Paragraph	Page
CHAPTER 1. INTRODUCTION		
Purpose	1-1	1-1
Scope.....	1-2	1-1
Objectives.....	1-3	1-1
CHAPTER 2. BASIC AIRFIELD INFORMATION		
Basic airfield data	2-1	2-1
Desired data	2-2	2-1
CHAPTER 3. OUTLINE OF BASIC CONDITION RATING PROCEDURE		
Condition survey and PCI rating	3-1	3-1
Airfield pavement condition survey report.....	3-2	3-2
Distribution of condition survey reports.....	3-3	3-2
CHAPTER 4. SAMPLING TECHNIQUES		
General.....	4-1	4-1
Inspection	4-2	4-1
CHAPTER 5. DETAILED SURVEY PROCEDURE FOR RIGID PAVEMENT		
Sample unit inspection and record keeping.....	5-1	5-1
Inspection summary	5-2	5-1
Sample unit PCI.....	5-3	5-16
Feature PCI	5-4	5-18
CHAPTER 6. DETAILED PROCEDURE FOR FLEXIBLE PAVEMENT		
Sample unit inspection and record keeping.....	6-1	6-1
Inspection summary	6-2	6-1
Sample unit PCI.....	6-3	6-18
Feature PCI	6-4	6-18
APPENDIX A. AIRFIELD PAVEMENT DISTRESS IDENTIFICATION		A-1

List of Figures

Figure 3-1.	Steps for determining PCI of a pavement feature
4-1.	Selection of minimum number of sample units.
4-2.	Illustration of division of a jointed rigid pavement feature into sample units of 20 slabs
4-3.	Example division of flexible pavement feature into sample units.
5-1.	Jointed rigid pavements, example condition survey data sheet
5-2.	Rigid pavement deduct values, distress 61, blowup.
5-3.	Rigid pavement deduct values, distress 62, corner break
5-4.	Rigid pavement deduct values, distress 63, longitudinal/transverse/diagonal cracking
5-5.	Rigid pavement deduct values, distress 64, durability cracking.
5-6.	Rigid pavement deduct values, distress 65, joint seal damage.
5-7.	Rigid pavement deduct values, distress 66, small patch
5-8.	Rigid pavement deduct values, distress 67, patching/utility cut defect.

Figure	5-9.	Rigid pavement deduct values, distress 68, popouts.
	5-10.	Rigid pavement deduct values, distress 69, pumping.
	5-11.	Rigid pavement deduct values, distress 70, scaling.
	5-12.	Rigid pavement deduct values, distress 71, settlement.
	5-13.	Rigid pavement deduct values, distress 72, shattered slab
	5-14.	Rigid pavement deduct values, distress 73, shrinkage cracks.
	5-15.	Rigid pavement deduct values, distress 74, spalling along the joints
	5-16.	Rigid pavement deduct values, distress 75, spalling corner
	5-17.	Corrected deduct values for jointed rigid pavements
	5-18.	Airfield PCI and rating.
	5-19.	Feature summary, jointed rigid pavement
	6-1.	Flexible pavements, example condition survey data sheet.
	6-2.	Flexible pavement deduct values, distress 41, alligator cracking.
	6-3.	Flexible pavement deduct values, distress 42, bleeding.
	6-4.	Flexible pavement deduct values, distress 43, block cracking.
	6-5.	Flexible pavement deduct values, distress 44, corrugation
	6-6.	Flexible pavement deduct values, distress 45, depression
	6-7.	Flexible pavement deduct values, distress 46, jet blast erosion
	6-8.	Flexible pavement deduct values, distress 47, joint reflective cracking
	6-9.	Flexible pavement deduct values, distress 48, longitudinal and transverse cracking.
	6-10.	Flexible pavement deduct values, distress 49, oil spillage.
	6-11.	Flexible pavement deduct values, distress 50, Patching and utility cut
	6-12.	Flexible pavement deduct values, distress 51, polished aggregate.
	6-13.	Flexible pavement deduct values, distress 52, raveling/weathering
	6-14.	Flexible pavement deduct values, distress 53, rutting.
	6-15.	Flexible pavement deduct values, distress 54, shoving of flexible pavement by PCC slabs.
	6-16.	Flexible pavement deduct values, distress 55, shippage cracking.
	6-17.	Flexible pavement deduct values, distress 56, swell
	6-18.	Corrected deduct values for flexible pavements,
	6-19.	Feature summary for flexible pavements
	A-1.	Low severity alligator cracking, case 1
	A-2.	Low severity alligator cracking, case 2
	A-3.	Low severity alligator cracking, approaching medium severity.
	A-4.	Medium severity alligator cracking, case 1.
	A-5.	Medium severity alligator cracking case 2
	A-6.	High severity alligator cracking.
	A-7.	Bleeding.
	A-8.	Low severity block cracking, case 1.
	A-9.	Low severity block cracking, case 2
	A-10.	Low severity block cracking, case 3
	A-11.	Medium severity block cracking, case 1.
	A-12.	Medium severity block cracking, case 2.
	A-13.	High severity block cracking, case 1
	A-14.	High severity block cracking, case 2
	A-15.	Illustration of corrugation
	A-16.	Corrugation.
	A-17.	Low severity depression
	A-18.	Medium severity depression, case 1.
	A-19.	Medium severity depression, case 2
	A-20.	High severity depression
	A-21.	Jet blast erosion, case 1.
	A-22.	Jet blast erosion, case 2
	A-23.	Low severity joint reflection cracking.
	A-24.	Medium severity joint reflection cracking, case 1
	A-25.	Medium severity joint reflection cracking, case 2
	A-26.	High severity joint reflection cracking.
	A-27.	Low severity longitudinal crack.
	A-28.	Low severity longitudinal cracks, approaching medium
	A-29.	Low severity crack, porous friction course pavement.
	A-30.	Medium severity longitudinal construction joint crack, case 1.
	A-31.	Medium severity longitudinal crack. case 2.
	A-32.	Medium severity crack, porous friction course pavement.
	A-33.	High severity longitudinal crack.
	A-34.	High severity crack, porous friction course pavement
	A-35.	Oil spillage, case 1.
	A-36.	Oil spillage, case 2.
	A-37.	Low severity patch, case 1.
	A-38.	Low severity patch, case 2

Figure	A-39.	Medium severity patch
	A-40.	High severity patch.
	A-41.	Polished aggregate
	A-42.	Low severity raveling/weathering, case 1.
	A-43.	Low severity raveling/weathering, case 2.
	A-44.	Typical porous friction course surface with no raveling and weathering, case 1.
	A-45.	Typical porous friction course surface with no raveling and weathering, case 2.
	A-46.	Low severity raveling/weathering in porous friction course pavement
	A-47.	Medium severity raveling/weathering
	A-48.	Medium severity raveling/weathering in porous friction course pavement.
	A-49.	Medium severity raveling/weathering showing rough and pitted surface in porous friction course pavement
	A-50.	High severity raveling/weathering
	A-51.	High severity raveling/weathering in porous friction course pavement.
	A-52.	Low severity rutting.
	A-53.	Low severity rutting
	A-54.	Medium severity rutting
	A-55.	Medium severity rutting
	A-56.	High severity rutting
	A-57.	High severity rutting
	A-58.	Low severity shove on the outside and medium severity in the middle
	A-59.	High severity shoving.
	A-60.	Slippage cracking, case 1
	A-61.	Slippage cracking, case 2.
	A-62.	Low severity swell.
	A-63.	Medium severity swell
	A-64.	High severity swell.
	A-65.	High severity swell.
	A-66.	Low severity blowup.
	A-67.	Medium severity blowup.
	A-68.	High severity blowup.
	A-69.	Low severity corner break, case 1.
	A-70.	Low severity corner break, case 2
	A-71.	Medium severity corner break, case 1.
	A-72.	Medium severity corner break, case 2.
	A-73.	High severity corner break.
	A-74.	Low severity longitudinal crack.
	A-75.	Low severity filled longitudinal cracks.
	A-76.	Low severity diagonal crack.
	A-77.	Medium severity longitudinal crack
	A-78.	Medium severity transverse crack, case 1.
	A-79.	Medium severity transverse crack, case 2.
	A-80.	High severity transverse crack.
	A-81.	High severity longitudinal crack, case 1
	A-82.	High severity longitudinal crack, case 2.
	A-83.	Low severity D cracking
	A-84.	Medium severity D cracking, case 1.
	A-85.	Medium severity D cracking, case 2.
	A-86.	High severity D cracking.
	A-87.	Low-severity joint seal damage.
	A-88.	Medium-severity joint seal damage.
	A-89.	High-severity joint seal damage
	A-90.	High-severity joint seal damage
	A-91.	Low-severity small patch, case 1.
	A-92.	Low-severity small patch, case 2.
	A-93.	Medium-severity small patch, case 1
	A-94.	Medium-severity small patch, case 2
	A-95.	High-severity small patch
	A-96.	Low-severity patch, case 1.
	A-97.	Low-severity patch, case 2.
	A-98.	Low-severity utility cut
	A-99.	Medium-severity utility cut.
	A-100.	High-severity patch
	A-101.	Popouts.
	A-102.	Pumping.
	A-103.	Pumping (note stained pavement)
	A-104.	Pumping (fine materials collected on surface)
	A-105.	Pumping.
	A-106.	Counting procedure for pumping.

Figure	A-107.	Low-severity crazing
	A-108.	Medium-severity scaling.
	A-109.	High-severity scaling.
	A-110.	Close-up of high severity scaling
	A-111.	Low-severity settlement on apron, case 1
	A-112.	Low-severity settlement on apron, case 2.
	A-113.	Medium-severity settlement on apron
	A-114.	High-severity settlement on taxiway/runway, case 1
	A-115.	High-severity settlement, case 2
	A-116.	Counting procedure for settlement or faulting.
	A-117.	Low-severity intersecting cracks, case 1.
	A-118.	Low-severity intersecting cracks, case 2.
	A-119.	Medium-severity intersecting cracks, case 1.
	A-120.	Medium-severity intersecting cracks, case 2
	A-121.	Shattered slab
	A-122.	Shrinkage crack, case 1.
	A-123.	Shrinkage crack, case 2.
	A-124.	Low-severity joint spall, case 1
	A-125.	Low-severity joint spall, case 2
	A-126.	Medium-severity joint spall, case 1.
	A-127.	Medium-severity joint spall, case 2.
	A-128.	High-severity joint spall, case 1
	A-129.	High-severity joint spall, case 2
	A-130.	Low-severity corner spall, case 1.
	A-131.	Low-severity corner spa", case 2.
	A-132.	Medium-severity corner spall, case 1
	A-133.	Medium-severity corner spall, case 2
	A-134.	High-severity comer spall.
	A-135.	Flexible pavement condition survey data sheet.
	A-136.	Rigid pavement condition survey data sheet.

List of Tables

Table	A-1.	Frequently occurring identification problems in pavement distress identification
	A-2.	Summary of distress types and identification numbers.
