

ELECTRIC POWER PLANT DESIGN

CHAPTER		<i>Paragraph</i>	<i>Page</i>
CHAPTER	1. INTRODUCTION		
	Purpose	1-1	1-1
	Design philosophy	1-2	1-1
	Design criteria	1-3	1-1
	Economic considerations	1-4	1-5
CHAPTER	2. SITE AND CIVIL FACILITIES DESIGN		
	Selection I. Site Selection		
	Introduction	2-1	2-1
	Environmental considerations	2-2	2-1
	Water supply	2-3	2-1
	Fuel supply	2-4	2-1
	Physical characteristics	2-5	2-1
	Economic	2-6	2-1
	Section II. Civil Facilities, Buildings, Safety, and Security		
	Soils investigation	2-7	2-2
	Site development	2-8	2-2
	Buildings	2-9	2-2
CHAPTER	3. STEAM TURBINE POWER PLANT DESIGN		
	Section I. Typical Plants and Cycles		
	Introduction	3-1	3-1
	Plant function and purpose.	3-2	3-1
	Steam power cycle economy	3-3	3-1
	Cogeneration cycles	3-4	3-3
	Selection of cycle steam conditions.	3-5	3-6
	Cycle equipment	3-6	3-6
	Steam power plant arrangement	3-7	3-6
	Section II. Steam Generators and Auxiliary Systems		
	Steam generator convention types and characteristics	3-8	3-9
	Other steam generator characteristics.	3-9	3-11
	Steam generator special types	3-10	3-12
	Major auxiliary systems	3-11	3-12
	Minor auxiliary systems	3-12	3-25
	Section III. Fuel Handling and Storage Systems		
	Introduction	3-13	3-26
	Typical fuel oil storage and handling system	3-14	3-26
	Coal handling and storage systems	3-15	3-27
	Section IV. Ash Handling Systems		
	Introduction	3-16	3-29
	Description of major components.	3-17	3-30
	Section V. Turbines and Auxiliary Systems		
	Turbine prime movers	3-18	3-30
	Generators	3-19	3-32
	Turbine features	3-20	3-32
	Governing and control	3-21	3-33
	Turning gear	3-22	3-33
	Lubrication systems	3-23	3-33
	Extraction features	3-24	3-34
	Instruments and special tools	3-25	3-34
	Section VI. Condenser and Circulating Water System		
	Introduction	3-26	3-34
	Description of major components	3-27	3-35
	Environmental concerns	3-28	3-40
	Section VII. Feedwater System		
	Feedwater heaters	3-29	3-40
	Boiler feed pumps	3-30	3-41
	Feedwater supply	3-31	3-43
	Section VIII. Service Water and Closed Cooling Systems		
	Introduction	3-32	3-43
	Description of major components.	3-33	3-44

		Paragraph	Page
CHAPTER	3. STEAM TURBINE POWER PLANT DESIGN (Continued)		
	Description of systems	3-34	3-44
	Arrangement	3-35	3-45
	Reliability of systems	3-36	3-45
	Testing	3-37	3-45
	Section IX. Water Conditioning Systems		
	Water conditioning selection.	3-38	3-45
	Section X. Compressed Air Systems		
	Introduction	3-39	3-46
	Description of major components.	3-40	3-46
	Description of systems	3-41	3-50
CHAPTER	4. GENERATOR AND ELECTRICAL FACILITIES DESIGN		
	Section I. Typical Voltage Ratings and Systems		
	Voltages	4-1	-1
	Station service power syetems.	4-2	4-1
	Section II. Generators		
	General types and standards.	4-3	4-3
	Features and accessories	4-4	4-7
	Excitation systems	4-5	4-8
	Section III. Generator Leads and Switchyard		
	General	4-6	4-8
	Generator leads	4-7	4-9
	Switchyard	4-8	4-13
	Section IV. Transformers		
	Generator stepup transformer	4-9	4-16
	Auxiliary transformers	4-10	4-16
	Unit substation transformer	4-11	4-17
	Section V. Protective Relays and Metering		
	Generator, stepup transformer and switchyard relaying	4-12	4-18
	Switchgear and MCC protection	4-13	4-19
	Instrumentation and metering.	4-14	4-19
	Section VI. Station Service Power Systems		
	General requirements	4-15	4-20
	Auxiliary power transformers.	4-16	4-20
	4160 volt switchgear	4-17	4-20
	480 volt unit substations	4-18	4-21
	480 volt motor control centers	4-19	4-21
	Foundations	4-20	4-21
	Grounding	4-21	4-21
	Conduit and tray systems	4-22	4-21
	Distribution outside the power plant.	4-23	4-22
	Section VII. Emergency Power System		
	Battery and charger	4-24	4-23
	Emergency ac system	4-25	4-23
	Section VIII. Motors		
	General	4-26	4-23
	Insulation	4-27	4-24
	Horsepower	4-28	4-24
	Grounding	4-29	4-24
	Conduit	4-30	4-24
	Cable	4-31	4-24
	Motor details	4-32	4-24
	Section IX. Communication Systems		
	Intraplant communications.	4-33	4-24
	Telephone communications.	4-34	4-26
CHAPTER	5. GENERAL POWER PLANT FACILITIES DESIGN		
	Section I. Instruments and Control Systems		
	General	5-1	5-1
	Control panels	5-2	5-1
	Automatic control systems.	5-3	5-5
	Monitoring instruments	5-4	5-9
	Alarm and annunciator systems.	5-5	5-14
	Section II. Heating, Ventilating and Air Conditioning Systems		
	Introduction	5-6	5-14
	Operations areas	5-7	5-14
	Service areas	5-8	5-14

		Paragraph	Page
CHAPTER	5. GENERAL POWER PLANT FACILITIES DESIGN (Continued)		
	Section 111. Power and Service Piping Systems		
	Introduction	5-9	5-15
	Piping design fundamentals...	5-10	5-15
	Specific system design considerations.	5-11	5-15
	Section IV. Thermal Insulation and Freeze Protection		
	Introduction	5-12	5-17
	Insulation design	5-13	5-17
	Insulation materials	5-14	5-17
	Control of useful heat losses.....	5-15	5-21
	Safety insulation	5-16	5-21
	Cold surface insulation	5-17	5-21
	Economic thickness	5-18	5-21
	Freeze protection	5-19	5-21
	Section V. Corrosion Protection		
	General remarks	5-20	5-22
	Section VI. Fire Protection		
	Introduction	5-21	5-22
	Design considerations	5-22	5-23
	Support facilities	5-23	5-24
	CHAPTER	6. GASTURBINE POWER PLANT DESIGN	
	General	6-1	6-1
	Turbine-generator selection	6-2	6-1
	Fuels	6-3	6-2
	Plant arrangement	6-4	6-2
	Waste heat recovery	6-5	6-2
	Equipment and auxiliary systems	6-6	6-3
CHAPTER	7. DIESEL ENGINE POWER PLANT DESIGN		
	Section I. Diesel Engine Generators		
	Engines	7-1	7-1
	Fuel selection	7-2	7-1
	Section II. Balance of Plant Systems		
	General	7-3	7-2
	Cooling systems	7-4	7-2
	Combustion air intake and exhaust systems	7-5	7-2
	Fuel storage and handling	7-6	7-2
	Engine room ventilation	7-7	7-2
	Section III. Foundations and Building		
	General	7-8	7-3
	Engine foundation	7-9	7-3
	Building	7-10	7-3
CHAPTER	8. COMBINED CYCLE POWER PLANTS		
	Section I. Typical Plants and Cycles		
	Introduction	8-1	8-1
	Plant details	8-2	8-1
	Section II. General Design Parameters		
	Background	8-3	8-1
	Design approach	8-4	8-2
APPENDIX A: BIBLIOGRAPHY	REFERENCES		

LIST OF FIGURES

Figure No.		Page
Figure 1-1	Typical Metropolitan Area Load Curves.	1-4
1-2	Typical Annual Load Duration Curve	1-5
3-1	Typical Straight Condensing Cycle.	3-2
3-2	Turbine Efficiencies Vs.Capacity	3-3
3-3	Typical Condensing-Controlled Extraction Cycle	3-5
3-4	Typical Small 2-Unit Power Plant "A"	3-7
3-5	Typical Small 2-Unit Power Plant "B"	3-8
3-6	Critical Turbine Room Bay and Power Plant "B"Dimensions	3-9
3-7	Fluidized Bed Combustion Boiler	3-13
3-8	Theoretical Air and Combustion Products	3-15
3-9	Minimum Metal Temperatures for Boiler Heat Recovery Equipment	3-16

	<i>Page</i>
3-10 Coal Handling System Diagram	3-26
3-11 Typical Coal Handling System for Spreader Stoker Fired Boiler (with bucket elevator)	3-28
3-12 Pneumatic Ash Handling Systems-Variations.	3-31
3-13 Types of Circulating Water Systems.	3-38
3-14 Typical Compressed Air System	3-50
3-15 Typical Arrangement of Air Compressor and Accessories	3-51
4-1 Station Connections-Two Unit Station Common Bus Arrangement	4-2
4-2 Station Connections-Two Unit Station-Unit Arrangement-Generator at Distribution Voltage.	4-4
4-3 Station Connections-Two Unit Station-Unit Arrangement-Distribution Voltage Higher Than Generation	4-5
4-4 One Line Diagram-Typical Station Service Power System	4-6
4-5 Typical Synchronizing Bus	4-9
4-6 Typical Main and Transfer Bus	4-10
4-7 Typical Ring Bus	4-11
4-8 Typical Breaker and a Half Bus.	4-12
5-1 Economical Thickness of Heat Insulation (Typical Curves)	5-22
6-1 Typical Indoor Simple Cycle Gas Turbine Generator Power Plant.	6-3
7-1 Typical Diesel Generator Power Plant	7-4
8-1 Combined Cycle Diagram	8-3

LIST OF TABLES

<i>Table No.</i>		<i>Page</i>
Table 1-1	General Description of Type of Plant.	1-2
1-2	Diesel Class and Operational Characteristics.	1-3
1-3	Plant Sizes	1-3
1-4	Design Criteria Requirements.	1-3
3-1	Theoretical Steam Rates for Typical Steam Conditions	3-4
3-2	Fuel Characteristics	3-10
3-3	Individual Burner Turndown Ratios	3-14
3-4	Emission Levels Allowable, National Ambient Air Quality Standards	3-17
3-5	Uncontrolled Emissions	3-18
3-6	Characteristics of Cyclones for Particulate Control.	3-19
3-7	Characteristics of Scrubbers for Particulate Control.	3-20
3-8	Characteristics of Electrostatic Precipitators (ESP) for Particulate Control.	3-21
3-9	Characteristics of Baghouses for Particulate Control	3-22
3-10	Characteristics of Flue-Gas Desulfurization Systems for Particulate Control.	3-23
3-11	Techniques for Nitrogen Oxide Control	3-24
3-12	Condenser Tube Design Velocities	3-36
3-13	General Guide for Raw Water Treatment of Boiler Makeup	3-47
3-14	Internal Chemical Treatment	3-48
3-15	Effectiveness of Water Treatment	3-49
4-1	Standard Motor Control Center Enclosures.	4-22
4-2	Suggested Locations for Intraplant Communication System Devices.	4-25
5-1	List of Typical Instruments and Devices for Boiler-Turbine Mechanical Panel.	5-1
5-2	List of Typical Instrument and Devices for Common Services Mechanical Panel.	5-4
5-3	List of Typical Instruments and Devices for Electrical (Generator and Switchgear) Panel.	5-6
5-4	List of Typical Instrument and Devices for Diesel Mechanical Panel.	5-8
5-5	Sensing Elements for Controls and Instruments	5-10
5-6	Piping Codes and Standards for Power Plants	5-16
5-7	Characteristics of Thermal Insulations.	5-18
