HEADQUARTERS  
DEPARTMENT OF THE ARMY  
Washington, DC 23 April 1987

No. 5-814-8

## EVALUATION CRITERIA GUIDE FOR WATER POLLUTION PREVENTION, CONTROL, AND ABATEMENT PROGRAMS

		<i>Paragraph</i>	<i>Page</i>
Chapter	1. <b>GENERAL</b>		
	Purpose . . . . .	1-1	1-1
	Scope . . . . .	1-2	1-1
	Synopsis . . . . .	1-3	1-1
Chapter	2. <b>WASTEWATER MANAGEMENT CONSIDERATIONS</b>		
	Introduction . . . . .	2-1	2-1
	Water Resources and usages . . . . .	2-2	2-1
	Effects of discharge on the environment . . . . .	2-3	2-1
Chapter	3. <b>NATURE AND ORIGIN OF WASTEWATERS</b>		
	Introduction . . . . .	3-1	3-1
	Wastewater characteristics . . . . .	3-2	3-1
	Sources of industrial and sanitary wastewater . . . . .	3-3	3-7
	Comparison of domestic and industrial wastewaters . . . . .	3-4	3-9
Chapter	4. <b>WASTEWATER DISCHARGE REGULATIONS</b>		
	Army Regulations . . . . .	4-1	4-1
	Legislation . . . . .	4-2	4-1
	The NPDES permit system . . . . .	4-3	4-4
	Establishment of effluent limitations for NPDES Permits . . . . .	4-4	4-6
	Pretreatment of industrial wastes discharged to municipal treatment systems . . . . .	4-5	4-13
Chapter	5. <b>WASTEWATER MANAGEMENT PROGRAM FORMULATION</b>		
	Introduction . . . . .	5-1	5-1
	Water and wastewater inventory . . . . .	5-2	5-3
	Solution methodology . . . . .	5-3	5-5
	Disposal alternatives . . . . .	5-4	5-8
	Upgrading of existing facilities . . . . .	5-5	5-14
	Environmental impact . . . . .	5-6	5-18
	Other considerations . . . . .	5-7	5-18
	Specific treatment needs . . . . .	5-8	5-20
Chapter	6. <b>WASTEWATER TREATMENT PROCESSES</b>		
	Preliminary and primary wastewater treatment processes . . . . .	6-1	6-1
	Biological wastewater treatment processes . . . . .	6-2	6-6
	Physical and chemical wastewater treatment processes . . . . .	6-3	6-14
	Industrial process wastewater treatment . . . . .	6-4	6-20
Chapter	7. <b>SOLIDS HANDLING AND DISPOSAL</b>		
	Introduction . . . . .	7-1	7-1
	Sludge characteristics . . . . .	7-2	7-1
	Conditioning and stabilization . . . . .	7-3	7-2
	Thickening . . . . .	7-4	7-2
	Dewatering . . . . .	7-5	7-3
	Incineration . . . . .	7-6	7-3
	Other processes . . . . .	7-7	7-3
	Solids handling process comparison . . . . .	7-8	7-4
Chapter	8. <b>SYSTEM ALTERNATIVES AND PERFORMANCE</b>		
	Introduction . . . . .	8-1	8-1
	Wastewater treatment systems . . . . .	8-2	8-1
	Effluent discharge alternatives . . . . .	8-3	8-9
	Solids handling systems . . . . .	8-4	8-10
Chapter	9. <b>ECONOMIC CONSIDERATIONS</b>		
	Introduction . . . . .	9-1	9-1
	Construction costs . . . . .	9-2	9-1
	Life cycle cost evaluation . . . . .	9-3	9-1
Appendix	A. <b>WASTEWATER TREATMENT AND SOLIDS HANDLING COST DATA</b>		A-1
Appendix	B. <b>WASTEWATER AND SOLIDS HANDLING DESIGN CRITERIA</b>		B-1
Appendix	C. <b>REFERENCES</b>		C-1

## LIST OF FIGURES

<i>Figure No.</i>	<i>Title</i>	<i>Page</i>
3-1.	Comparison of domestic wastewater with selected military industrial wastewater.	3-10
3-2.	Typical TNT production process.	3-16
3-3.	Typical shell-filling and renovating (LAP) plant operation.	3-19
4-1.	Highlights of the Federal Water Pollution Control Act.	4-2
4-2.	Features of Resource Conservation and Recovery Act (RCRA).	4-3
5-1.	Program formulation problem solving cycle.	5-2
5-2.	Factors to be considered in a wastewater management program.	5-4
6-1.	The effect of equalization on a wastewater with variable pH.	6-4
6-2.	Emsulfified oil removal by cracking and chemical coagulation.	6-31
8-1.	Alternative wastewater treatment processes for military installations.	8-2
8-2.	Alternative sludge processing systems for military installations.	8-11
9-1.	Commonly used indices.	9-2
A-1.	Cost of raw waste pumping.	A-2
A-2.	Cost of preliminary treatment.	A-3
A-3.	Cost of primary clarifiers.	A-4
A-4.	Cost of FeCl <sub>3</sub> addition.	A-5
A-5.	Cost of activated sludge.	A-6
A-6.	Cost of high rate trickling filter.	A-7
A-7.	Cost of suspended growth vitrification system.	A-8
A-8.	Cost of final clarifiers.	A-9
A-9.	Cost of two stage lime clarification.	A-10
A-10.	Cost of multi-media filtration.	A-11
A-11.	Cost of chlorination.	A-12
A-12.	Cost of granular carbon absorption.	A-13
A-13.	Cost of two stage anaerobic digestion.	A-14
A-14.	Cost of vacuum filtration.	A-15
A-15.	Cost of sludge drying beds (uncovered).	A-16

## LIST OF TABLES

<i>Table No.</i>	<i>Title</i>	<i>Page</i>
2-1.	Undesirable characteristics and effects of wastewater discharges and remedial approaches.	2-3
3-1.	Common enteric pathogenic bacteria and related disease.	3-5
3-2.	Common parasites and related disease.	3-6
3-3.	Average pollutant loading and wastewater volume from domestic household (four members) (100).	3-7
3-4.	Sewage volume and BOD for various services (126).	3-8
3-5.	Comparison of domestic wastewater characteristics with selected military industrial wastewater.	3-10
3-6.	Average characteristics of domestic sewage.	3-11
3-7.	Summary of wastewater quality from maintenance and exterior cleaning activities.	3-12
3-8.	Characteristics of phenolic aircraft paint-stripping wastewater.	3-14
3-9.	Typical laundry waste characteristics.	3-14
3-10.	Analysis of photographic processing wastewater discharge.	3-14
3-11.	Typical TNT wastewater characteristics.	3-17
3-12.	Typical nitroglycerine wastewater characteristics.	3-17
3-13.	Typical munitions metal parts wastewater characteristics.	3-18
3-14.	Typical LAP facility industrial wastewater characteristics.	3-18
4-1.	NPDES primary industry categories*.	4-7
4-2.	Toxic organics.	4-8
4-3.	Existing BPT effluent guidelines for point sources.	4-10
4-4.	Toxic pollutants.	4-11
4-5.	BPT and BAT Standards for metals finishing 40 CFR Part 433 (mg/L).	4-12
4-6.	U.S. EPA secondary treatment standards for municipal discharges.	4-12
4-7.	Pretreatment standards for electroplating point source category, existing sources, all subcategories, discharge of 10,000 gpd or less.	4-13
4-8.	Pretreatment standards for electroplating point source category, existing sources, all subcategories, discharges of 10,000 gpd or more.	4-14
4-9.	Pretreatment standards metal finishing.	4-15
4-10.	Prohibited industrial discharges to publicly owned treatment works (POTW's).	4-15
4-11.	Industries for which initial categorical pretreatment standards are being written.	4-16
5-1.	Example of waste load reductions by in-plant control.	5-7

## LIST OF TABLES (Cent'd)

<i>Table No.</i>		<i>Page</i>
5-2.	Potential non-compliance materials and example control measures.	5-10
5-3.	Stream classification for water quality criteria.	5-11
5-4.	Ten top ranked causes of poor plant performance.	5-15
6-1.	Typical effluent levels of principal domestic wastewater characteristics by degree of treatment.	6-2
6-2.	Summary characteristics of the activated sludge process variations.	6-9
6-3.	General trickling filter design criteria.	6-12
6-4.	Summary of primary and biological wastewater treatment processes.	6-15
6-5.	Expected effluent suspended solids from multi-media filtration of secondary effluent.	6-19
6-6.	Summary of physical and chemical wastewater treatment processes.	6-20
7-1.	Typical raw sludge quantities.	7-1
7-2.	Typical raw sludge solids content.	7-1
7-3.	Summary of solids handling and disposal.	7-5
8-1.	Classification of Army facilities by wastewater flow.	8-1
8-2.	Performance of typical wastewater treatment system alternatives.	8-4
8-3.	Chemical conditioning requirements for various sludge types (167).	8-12
8-4.	Thickening characteristics of various sludge types (percent solids) (167).	8-13
8-5.	Advantages and disadvantages of using sludge drying beds.	8-13
8-6.	Typical sludge concentrations produced by vacuum filtration.	8-13
8-7.	Typical dewatering performance of belt filter presses.	8-13
8-8.	Typical dewatering performance of filter presses (167).	8-14
9-1.	Typical geographical variations in cost indices (values are ENR construction cost index for March 1983).	9-1
