

Patient Diagnosis	Acuity**	Clinical Differentiation Impacting the Facility Design	NFPA 99 Space Category & NFPA 101 Classification	Recommended Facility Solution Per PWS's	
				Hotel (H2HC)	Arena (A2HC)
COVID Positive	Acute*	Airborne Infectious On Ventilator	Cat 2 Plus* (General/Critical Care) Non-Ambulatory	Single Patient Space Negative Pressure Room Line of Sight to Patient (vision panel/camera?)	Single Patient Space Negative Pressure Pod Line of Sight to Patient (Vision panel)
COVID Positive or Presumed Positive (pending test)	Non-Acute	Airborne Infectious Not On Ventilator. May require supplemental oxygen.	Cat 3 (Basic Care) Ambulatory	Single Patient Space No negative pressure. Isolation by floor/room. Line of sight not required (cameras to reduce contact)	Single Patient Space Open Cube. Negative Pressure to Patient Care Area (arena) Line of sight not required
NON-COVID	Non-Acute	Not airborne infectious	Cat 3 (Basic Care) Ambulatory	No Special Requirements – No negative pressure. Multi-patient room permissible Line of sight not required	No Special Requirements – No negative pressure. Multi-patient bays permissible. Line of sight not required
NON-COVID	Acute	Not airborne infectious May require medical support spaces not in ACS.	Cat 2 (General Care) Non-Ambulatory	Typical Med/Surg May not be appropriate for ACS*	Typical Med/Surg May not be appropriate for ACS*
NON-COVID	Critical	Intense medical needs beyond Cat 2 Plus. Multiple Comorbidity	Cat 1 (Critical Care) Non-Ambulatory	Hospital ICU/AII/PE ACS not intended for full Category 1 Provisions.	Hospital ICU/AII/PE ACS not intended for full Category 1 Provisions

	Applicable Performance Work Statement for Alternate Care Site (ACS)	NOTES
	- H2HC Acute (COVID)	* Category 2 Plus applies NFPA 99 Category 2 considerations (General Care – risk of minor injury) plus additional Category 1 provisions (Critical Care – risk of major injury or death) as relates to the specific needs of a COVID-positive patient on a ventilator. **This column is not intended to represent true clinically defined patient acuity but represents a general categorization (and terminology) used across the PWS's.
