

**PAX Newsletter No 3.2.1, 13 February 2006**  
**DoD AREA COST FACTORS (ACF)**  
**TABLE – B, PART I and II (US and Foreign Locations)**

1. The attached Area Cost Factors (ACFs) supersedes the ACF list published by the PAX Newsletter No 3.2.1, dated 31 January 2005, and the Appendix B, Location Adjustment Factors Table of the current Army Technical Manual TM 5-800-4, Programming Cost Estimates for Military Construction (MILCON), dated May 1994. The updated ACFs shall be used, along with primary facilities unit costs from the current issue of the PAX Newsletter No 3.2.2, Appendix-A, Part –I, in preparation and review of the FY 2008 MILCON, Military Transformation, and Army Family Housing (AFH) projects DD Forms 1391 and budget cost estimates. These factors are NOT intended for use to develop and/or modify individual facilities Sustainment Costs, detailed quantity-take-offs, unit price book (UPB) line items, commercial cost data, or user generated unit costs. These other cost estimating systems and databases have their own processes and factors for adjusting costs to different locations.

2. *The overall ACF for the state/country should be used when there is no specific ACF for a location within the state/country. The ACF for the closest location should be used only when market conditions (e.g. material prices, labor rates, labor availability, bidding climate) are similar.*

3. The ACF for each location reflects the relative relationship of construction costs at that location to the National average as 1, determined from 96 Base Cities (two cities per state in CONUS) average construction costs. In general, the ACF index is developed based on the local construction costs for a market basket of 8 labor crafts, 17 construction materials, 4 equipment items, and seven other matrix factors that reflect local conditions affecting construction costs, such as weather, climatic (frost zone, wind load), seismic, contractor overhead and profit, life support and mobilization, labor availability and labor productivity compared to the U.S. standard. These labor, materials, and equipment (LME) items are representative of the types of products and services used to construct most military facilities. In 2004, the market survey covered a list of 202 locations that includes 96 Base Cities, 106 additional locations in the U.S. and 91 overseas locations. A new construction market survey will be conducted in 2006.

4. ACF for some locations has been updated from the previous list utilizing the latest data input from the Services' and field offices. There is no easy correlation between the current ACFs and previous ACFs for specific locations. No common benchmarks exist because both the Base City average and the relationships between cities change for each two-year cycle. It is possible, however, to compare differences between several locations in this database with differences between the same locations in previous databases.

5. Point of contacts for this Newsletter at Headquarters, US Army Corps of Engineers are: Mr. Ami Ghosh, phone (202)-761-7503, DSN 763-7503, e-mail [amitava.ghosh@usace.army.mil](mailto:amitava.ghosh@usace.army.mil), and Mr. Raymond Lynn, phone (202)-761-5887, DSN 763-5887, e-mail [Raymond.L.Lynn@usace.army.mil](mailto:Raymond.L.Lynn@usace.army.mil)

NOTE-1 The Exchange Rates in "RED" color (in column-3) are the recent official exchange rates, as published in the Program Budget Decision Memorandum (PBD) 660, Title: Foreign Currency Fluctuations, dated 20 Dec 2005, and should be used for the development of FY08 MILCON Budget Estimate Submittal. These are not necessarily the exchange rates prevailing when the locality ACF surveys were undertaken. The exchange rates not indicated in "BOLD" are the rates that prevailed at the time of locality ACF survey, and are not necessarily the most current exchange rates, and should not be used without validation.
